

Flood information for Lilydale in Yarra Ranges

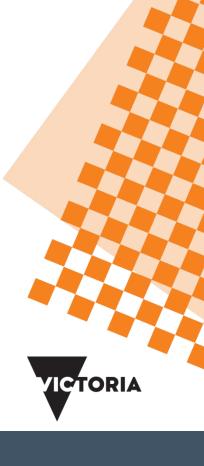

For flood emergency assistance call VICSES on 132 500

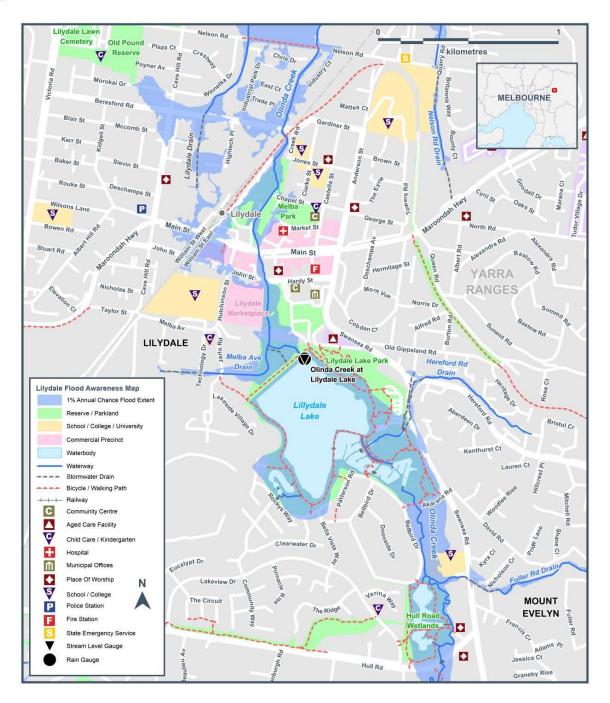

# Lilydale

Lilydale is the gateway to both the Dandenong Ranges and the Yarra Valley. With 38 kilometres of recreation trails as well as a mix of new urban cafes and restaurants, Lilydale is a popular destination to both live and visit. Lilydale is located in the Yarra Ranges on the banks of the Olinda Creek. Olinda Creek flows from near Mount Dandenong in Olinda through Lilydale, feeding into Lilydale Lake, and then continuing to flow north where it meets the Yarra River at Yering. In addition to Lilydale Lake and the Olinda Creek, there are several drains in the area which affect water flow during heavy rainfall.

The map below shows the impact of a 1% flood in the Lilydale area. A 1% flood means there is a 1% chance a flood this size could happen in any given year. This map is provided as a guide to possible flooding in the area.

Flood information is provided by Melbourne Water

# Are you at risk of flood?

Lilydale Lake serves as a flood retarding basin for the area. Retarding basins are built to absorb and contain flooding in periods of high rain, helping to lower the chances of damaging flooding in the area. While this helps reduce the likelihood of damaging flooding in the area, parts of Lilydale can still be affected when heavy rain falls over a short period of time, causing flash flooding. This can overwhelm the creek and drainage systems and spill over into the surrounding area.

Flash flooding can occur with little warming, lasts only a short time but can leave severe damage in the local area. During flash flooding, parts of Lilydale may experience isolation for short periods as roads become inaccessible due to flood waters.

Roads that may be flooded in the area include:

Swansea Road	Hightech Place	Main Street service lanes (north and south)
Akarnana Road	Hull Road	Morokai Grove
Beresford Road	Industry Court	Nelson Road
Cave Hill Road	Industry Park Drive	Quarry Road
Chapel Street	John Street	William Street East

# Did you know?

The Yarra Ranges has a history of flooding with floods recorded as early as 1891. Recent flooding in the Lilydale area include:

In December 2016, flash flooding occurred across the Yarra Ranges due to a severe storm where 50 millimetres of rain fell within a 16hour period and 15 millimetres within just 10 minutes. This amount of rain overwhelmed gutters on a number of houses and both Beresford and Hereford roads were flooded as well as the Maroondah Highway.

No two floods are the same. Floods like this or worse could occur again.

If you live in a low-lying area you may be at risk of flooding or need to detour around flooded areas.

Knowing what to do can save your life and help protect your property

On the 7<sup>th</sup> February 2002, Lilydale received the equivalent of a month's rainfall in just two hours. During the flood, several houses were flooded and roads were closed to traffic.

If you require assistance during a flood or storm, contact SES on 132 500. Your local SES Lilydale Unit will be able to assist you.

Beresford Road / Cave Hill Road, Lilydale. December 29th, 2016

# Flood warnings and emergency checklist

A **Flood Watch** means there is a developing weather pattern that might cause floods in one or two days. This service covers the whole state.

A **Flood Warning** means flooding is about to happen or is already happening. There are minor, moderate and major flood warnings. This service is only available where flood warning systems are in place.

A Minor Flood Warning means floodwater can:	A Moderate Flood Warning means floodwater can:	A Major Flood Warning means floodwater can:
Spill over river banks and cover nearby low lying areas.	Spill over river banks and cover larger areas of land.	Cause widespread flooding.
Come up through drains in nearby streets.	Reach above floor levels in some houses and buildings.	Many houses and businesses are inundated above floor level.
Require the removal of stock in some cases.	Require evacuation in some areas.	Cause properties and whole areas to be isolated by water.
Cover riverside camping areas and affect some low-lying caravan parks.	Affect traffic routes.	Closes major roads and rail routes.
Cover minor roads paths, tracks and low level bridges.	Require the removal of stock in rural areas.	Require many evacuations.
Affect backyards and buildings below floor level.		Affect utility services (power, water, sewage etc).

#### **Severe Thunderstorm Warnings**

Thunderstorms are classified as severe when there is potential to cause significant localised damage through wind gusts, large hail, tornadoes or flash flooding. Severe Thunderstorm Warnings are issued to the community by BoM.

### **Severe Weather Warnings**

These warnings are issued to the community by BoM when severe weather is expected that is not directly related to severe thunderstorms or bushfires. Examples of severe weather include damaging winds and flash flooding.

#### Flash Flooding

- Flash Flooding can occur quickly due to heavy rainfall. You may not receive an official warning.
- Stay informed- monitor weather warnings, forecasts and river levels at the <u>BoM website</u> and warnings through <u>VicEmergency</u>.

# **VICSES Warnings**

VICSES utilises the VicEmergency app, website and hotline to distribute flood warnings and emergency information in Victoria. Communities can also access this information through VICSES social media channels and emergency broadcasters.

VICSES warnings aim to provide you with information to help you make good decisions to protect yourself and your family

The warning level is based on severity, conditions and the likelihood that the emergency could impact on the community.

#### **WARNING LEVELS**

#### **EMERGENCY WARNING**

You are in imminent danger and need to take action immediately. You will be impacted. A Major flood warning usually fits into this category

#### **WARNING (WATCH AND ACT)**

An emergency is developing nearby. You need to take action now to protect yourself and others. A Moderate flood warning usually fits into this category.

#### **ADVICE**

An incident is occurring or has occurred in the area. Access information and monitor conditions.

Can also be used as a notification that activity in the area has subsided and is no longer a danger to you. A Minor flood warning or Flood Watch usually fits into this category.

#### **ADDITIONAL MESSAGES**

#### PREPARE TO EVACUATE/ EVACUATE NOW

An evacuation is recommended or procedures are in place to evacuate.

#### **COMMUNITY INFORMATION**

A newsletter containing updates for communities affected by an emergency.

Can also be used as a notification that an incident has occurred but there is no threat to community.

#### **EMERGENCY ALERT**

During some emergencies, we may alert communities by sounding a local siren, or by sending an SMS to mobile phones or a voice message to landlines.

# Your emergency plan

Emergencies can happen at any time and with little warning. People who plan and prepare for emergencies can reduce the impact and recover faster.

Taking the time to think about emergencies and make your own plan helps you think clearly, have more control and make better decisions when an emergency occurs.

Visit redcross.org.au/prepare start creating your plan.

- Remember, you may not receive any official warning.
- Emergency assistance may not be immediately available.
   Be aware of what is happening around you to stay safe.
- Never wait for a warning to act.

ARE YOU READY

ONE SIMPLE THING TO MAKE YOU SAFER

# **Emergency Kit**

Visit Emergency Toolkit for more information

Every home and business should have a basic emergency kit with supplies for 3 days:

Check your kit often. Make sure things work. Replace out of date items.

When a warning is issued, have ready for use or pack into your kit: I need to add:

Write your list here. Tick items as you pack them into your kit.

Special needs (eg, babies, elderly and people with a disability)

Valuables	
Other	

Reviewed: 1 July 2020 7

Check if your insurance policy covers flooding.  Keep this list of emergency numbers in your mobile phone.  Download the Vic Emergency app on your mobile phone.  Put together an emergency kit and prepare a home or business.  Emergency plan, see <a href="https://www.redcross.org.au/prepare">https://www.redcross.org.au/prepare</a>
fore Flooding Leaving early before flooding occurs is always the safest option. Evacuating through floodwater is very dangerous and you may be swept away.  Stay informed- monitor weather warnings, forecasts and river levels at the <a href="http://www.bom.gov.au">http://www.bom.gov.au</a> and warnings through <a href="http://www.bom.gov.au">www.emergency.vic.gov.au</a> Secure objects likely to float and cause damage.
Listen to the radio and check the VICSES website for information and advice.  Go over your emergency plan. Pack clothing and other extra items into your emergency kit and take this with you if you evacuate.
Make sure your family members and neighbours are aware of what is happening. Conditions change rapidly; roads and escape routes can be covered or blocked. Put household valuables and electrical items as high as possible. Turn off water, gas and electricity at the mains. If you are staying in a caravan, move to higher ground before flooding begins. Seek shelter indoors, away from floodwater. If floodwater comes inside, move to a higher point such as a kitchen bench or second storey. Stay away from trees, drains, low-lying areas, creeks, canals, culverts and floodwater.
acuating in Flooding Flood water is dangerous. Never enter floodwater. It can take just 15cm of water to float a car. Find alternative travel routes if roads or underpasses are flooded. Be aware of driving hazards, such as mud, debris, damaged roads and fallen trees. If driving conditions are dangerous, safely pull over away from trees, drains and floodwater.
For recovery information, contact your local council, go to the VicEmergency Relief and Recovery- emergency.vic.gov.au/Relief page or call the VicEmergency Hotline (1800 226 226).  Have all electrical and gas equipment professionally tested before use.  Stay away from damaged and flooded buildings, fallen trees and powerlines and damaged roads until authorities advise it is safe to do so.  Drive slowly, obey all road signs and never drive through floodwater.
When cleaning, protect your health and safety. Wear strong boots, gloves and protective clothing and

For VICSES emergency assistance, call **132 500**, or **Triple Zero (000)** in life threatening emergencies.

wash your hands and clothes regularly.
