Local flood information

There have been 16 significant flood events in Jeparit between 1909 and 2011.

The depth of water in Lake Hindmarsh, and the ground dryness can influence the flooding in Jeparit.

Flooding can happen within hours, giving people little to no time to prepare and take action.

Why does Jeparit flood?

When the Wimmera River rises and overflows its banks, and spills water onto land, it causes **riverine flooding**.

The most common cause of this is prolonged heavy rainfall.

- Jeparit is built along the Wimmera River and parts of the town are on the floodplain. The naturally low-lying areas are more likely to be impacted in a flood.
- The earliest indicator of flooding in Jeparit is when water breaks out of the Wimmera River near the Sir Robert Menzies Park.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

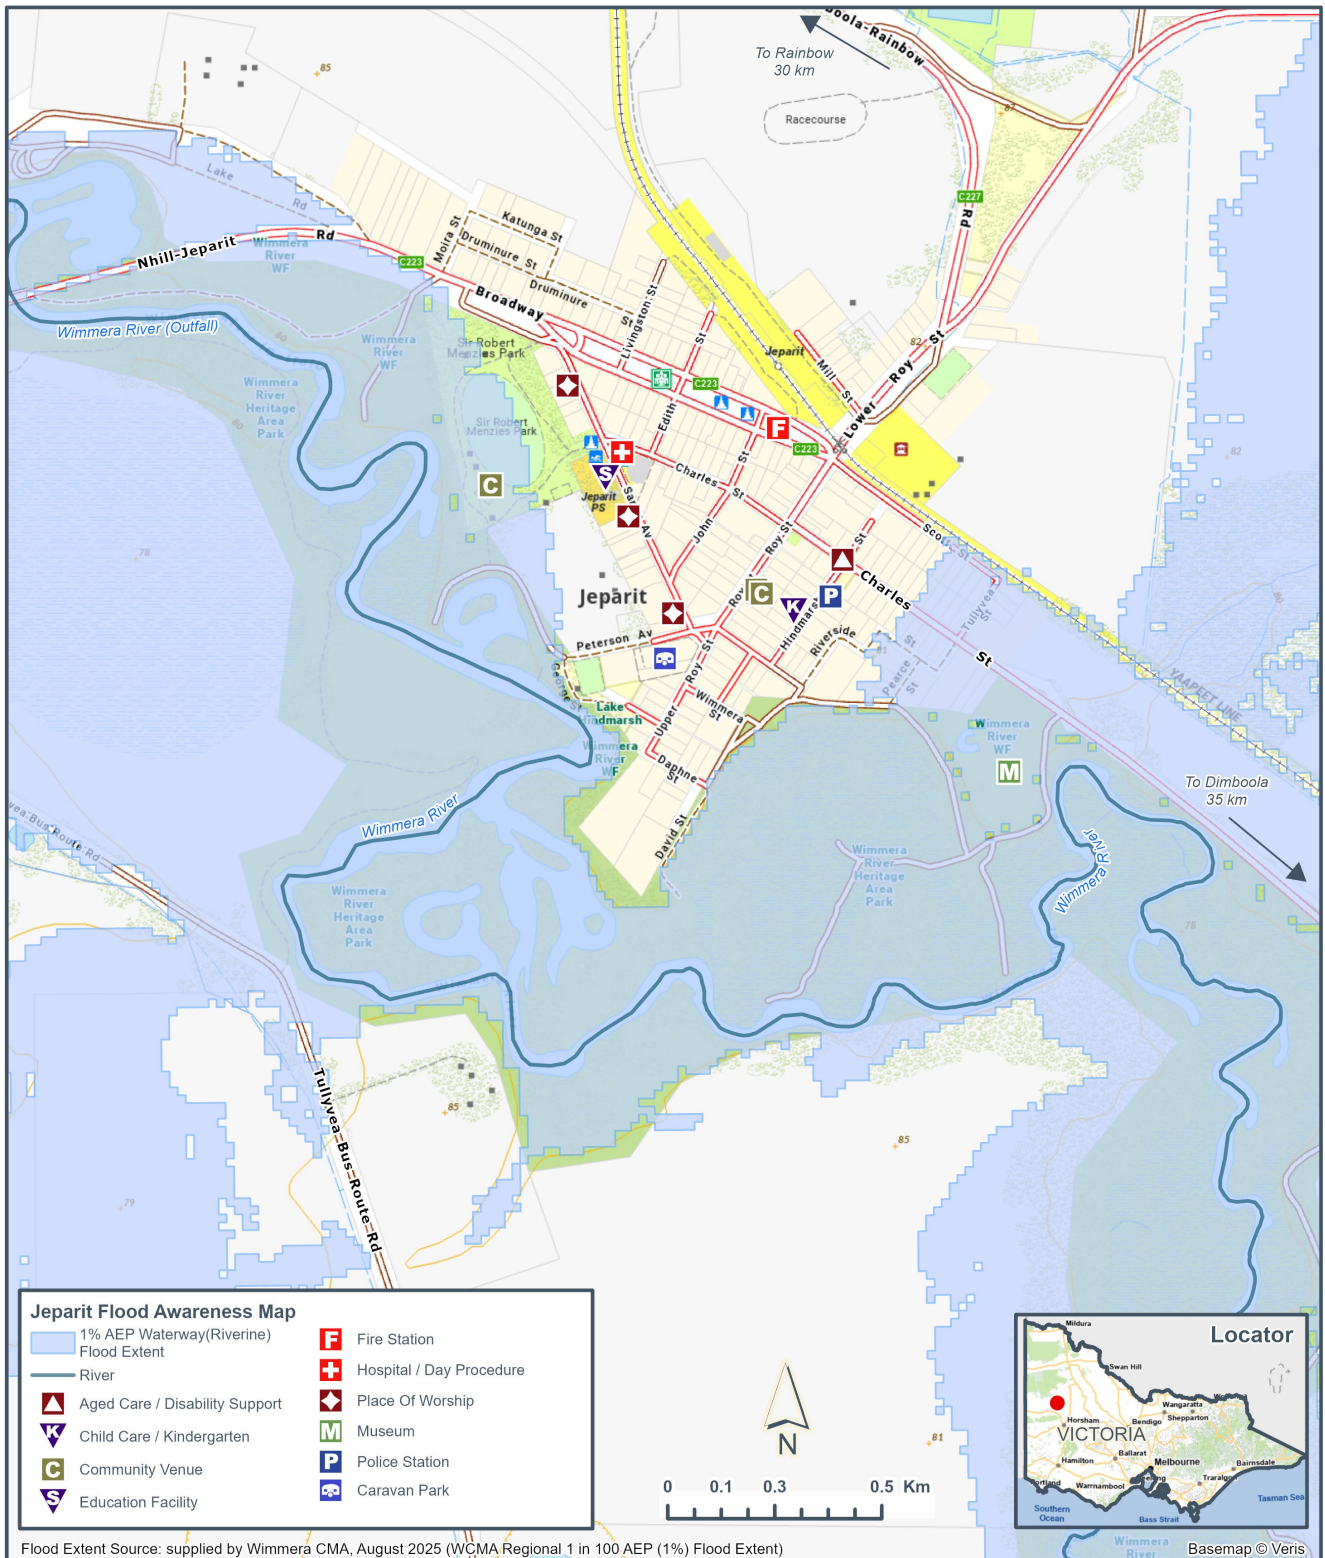

Check your home, work, and travel routes for floodwater

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See page 7 for more information.

- This map shows the likely areas to flood in a 1% Annual Exceedance Probability (AEP).
- AEP is the likelihood of a flood of that happening in any year. For example, a 1% flood has a 1% chance (or greater) of happening in any year.

View an interactive version of this map through the [Wimmera Catchment Management Authority](#), see [page 6](#) more for information.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below table provides an idea of what to expect at different flood heights.

- **Before a flood:** Use the floodwater heights in the table to help you decide when you will need to act to protect yourself and your property in a flood event.
- **During a flood:** When a warning is issued by [VicEmergency](#), use the predicted floodwater height and warning information to understand what the potential impacts may be for you and your community.

Height* (Metres)	How likely is this flood to happen^	Potential impacts and previous flood events^
5.93m (Height shown map page 4)	1% AEP (or greater) chance in any year	In addition to the areas impacted below: <ul style="list-style-type: none"> ■ Floodwater overtops the levee and inundates land between Dimboola-Rainbow Road and Jeparit East Road, north-east of Jeparit township. ■ 16 properties experience over-floor flooding. ■ Five properties are flooded within 100 millimetres of floor level ■ 10 experience below floor flooding. ■ In addition to below road impacts, Charles Street becomes inundated.
5.82m		January 2011 flood event.
5.77m	2% AEP (or greater) chance in any year	In addition to the areas impacted below: <ul style="list-style-type: none"> ■ Main traffic routes may be affected including Nhill-Jeparit Rd. ■ Some buildings may be affected above floor level. ■ In rural areas, removal of stock may be required.
5.49m	5% AEP (or greater) chance in any year	In addition to the areas impacted below: <ul style="list-style-type: none"> ■ Low-lying areas next to watercourses are inundated. ■ Minor roads may be closed and low-level bridges submerged. ■ In urban areas inundation may affect some backyards and buildings below floor level, and bicycle and pedestrian paths.
5.19m	10% AEP (or greater) chance in any year	In addition to the areas impacted below: <ul style="list-style-type: none"> ■ Properties between Antwerp and Jeparit become isolated
4.78m	20% AEP (or greater) chance in any year	<ul style="list-style-type: none"> ■ Tarranyurk West Road is inundated. ■ Rural cropping land is inundated.

*The height measurement is at the Upstream Dimboola Gauge.

^This table includes information from previous flood events.

What roads are likely to flood?

During a flood, the roads listed below may flood and could be closed.

For current road closures, check [VicTraffic](#). [VicEmergency](#) may include road closures in its warnings, see [page 8](#) for more information.

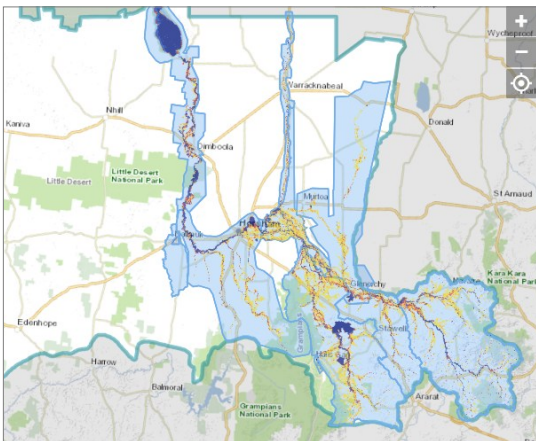

- Charles Street
- Jeparit East Road
- Nhill-Rainbow Road
- Riverside Street
- Roy Street
- Scott Street
- Tullyvea Street

Important

Stay safe by never driving through floodwater. It can take just 15cm of flowing water to float a car, that's the height of an average pen.

Download your free Property Flood Report

Wimmera Catchment Management Authority offers tools for residents and businesses to assess their flood risk.

- Use the map to zoom in on your property and see if it's likely to be affected in a large flood event.
- Download a free Planning Property Report which will tell you if your property has a flooding overlay.

Go to wcma.vic.gov.au/advice-and-services/flood-advice.

In a flood emergency, stay informed through [VicEmergency](#), see [page 8](#) for more information.

Your local services

Catchment Management Authority

For general advice about flooding and controls on planning scheme amendments.

- **Wimmera Catchment Management Authority**
wcma.vic.gov.au | 03 5382 1544

Local Council

For relief support after a flood event and general land use planning.

- **Hindmarsh Shire Council**

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.

youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- Keep gutters and drains clear of debris including leaves and any other items.
- Check your building and contents insurance, what kind of flooding does it cover?
- Move your valuable possessions up high.
- Back up important files and documents to a cloud storage or USB kept elsewhere.
- Identify higher ground on or around your property, away from the danger area.
- Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

Emergency broadcasters

Radio | ABC 594AM, 3WM 1089AM, Mixx 94.5FM

TV | Sky News

If you expect floodwater at your property

1

Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

For more details and other tips, visit:

ses.vic.gov.au/flood

Sandbagging

Protecting your home

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

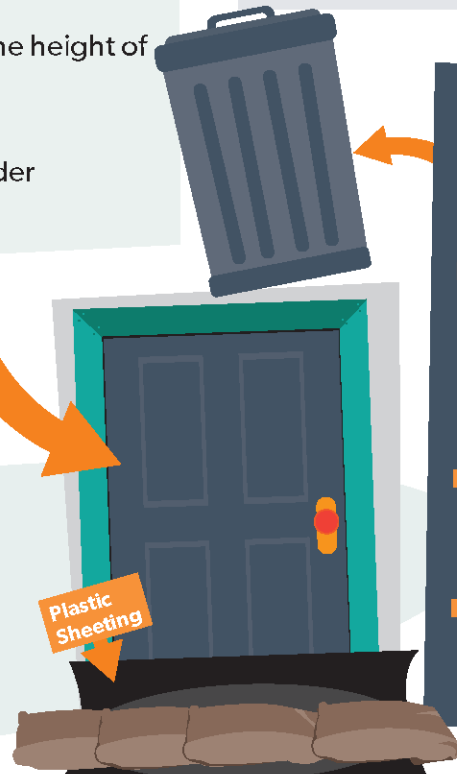

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel or hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centers.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water-resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
