FLOOD STORM EMERGENCY **132 500**

For more information visit www.ses.vic.gov.au

The Port Fairy local area

Port Fairy is located on the south-western Victorian coastline along the Princess Highway where the Moyne River meets the Southern Ocean.

The main waterways in and around the town are the Moyne River, Murray Brook, Reedy Creek and Belfast Lough.

The map below shows the predicted extent of flooding at three different heights on the Toolong River Gauge on the Moyne River; 4.1 metres, 4.4 metres and 5.1 metres:

Your local emergency broadcasters are:

- ABC Local 1602 AM
- Coast 95.3 FM
- SKY NEWS Television

Disclaimer

This publication is presented by the Victoria State Emergency Service for the purpose of disseminating emergency management information. The State Emergency Service disclaims any liability (including for negligence) to any person in respect of anything and the consequences of anything, done, or not done of any kind including damages, costs, interest, loss of profits or special loss or damage, arising from any error, inaccuracy, incompleteness or other defect in this information by any such person in whole or partial reliance upon the whole or part of the information in this map publication. Flood information is provided by Glenelg Hopkins Catchment Management Authority.

Are you at risk of flood?

Port Fairy is vulnerable to flooding due to its location on the Moyne River and the nearby estuary and the ocean. The town and surrounding areas are at risk because of heavy rainfall as well as king tides and storm surges.

Currently floods in Port Fairy can:

- Impact the airfield and caravan parks in low-lying areas.
- Close the Princes Highway at Yambuk, Rosebrook and Reedy Creek.
- Isolate areas along the sand dunes including the Life Saving Club and the ocean side of Griffiths Street.

More serious floods can flood properties to over floor height, flood key infrastructure and facilities and isolate the town and surrounding areas, cutting off roads in and out of the area.

Port Fairy can also be affected by flash flooding, where heavy localised rainfall falls in a short amount of time.

Moyne River Flood Levels at the Toolong Gauge

While no two floods are the same, the following table can give you an indication of what you can expect at certain heights, on the Toolong Gauge, including when your access may be cut off and when your property may be affected. There are no flood class levels (minor, moderate or major) for Port Fairy and the Toolong Gauge is not monitored by the Bureau of Meteorology.

While not monitored, the Toolong Gauge can still provide you with an indication of what you might experience during a flood as some warnings will give a comparison of a previous flood event in the area:

Unknown	1894 flood level According to local history, this was the highest flood ever in Port Fairy but it was before gauges so the height was not officially recorded. This flood caused extensive stock losses in the area.
5.7 m	1946 flood level Largest flood on record.
5.1 m	If a flood occurred at this level today, 191 properties in Port Fairy would be flooded, 50 above floor level and 141 below floor level and a total estimated damage bill of \$1,775,149. Height shown on map on page 2.
4.5 m	August 1978 flood level
4.4 m	If a flood occurred at 4.4m today, a total of 43 properties would flood, four above the floor and 39 below floor level. Estimated damage costs in 2008 prices would be \$127,980. Height shown on map on page 2.
4.35 m	August 2010 flood level
4.3 m	At this height, the Sewage station would be affected. Sand dunes at the end of the airport may be breached. Many roads and bridges closed including: Princes Highway (at Yambuk, Rosebrook and Reedy Creek), Toolong North Road, Port Fairy to Hamilton Road, Penshurst to Warrnambool Road, Woolsthorpe to Heywood Road, Griffith Road near the golf course.
4.1 m	At this height, there would be widespread rural farmland flooding, especially north of Princess Highway. Height shown on map on page 2.
3.7 m	August 2001 flood level The airport would flood at this level.

Did you know?

Port Fairy has a history of flooding in and around the town. Although local knowledge indicates that the highest flood occurred in 1894, this was before records began and was not officially recorded. March 1946 is the largest flood on record. In addition, Port Fairy has experienced flooding in 1978, 2001 and most recently in August 2010.

In 1946, 205.5 mm of rain fell over the area along with a peak tide, causing a flood that measured 5.7 metres on the Toolong Gauge resulting in:

- Widespread evacuations.
- The bridge over the Moyne River at Gipps street was blocked due to hay and debris floating in the river.
- Isolation and inundation of properties.
- Damage to infrastructure including roads.

Floods like this or worse could occur again.

If you live or work close to a creek, river or low-lying area you may be at risk from floods. If you are not directly affected, you may still have to detour around flooded areas.

It is important for families, business and locals to be aware of the risks, be prepared and have their emergency plans ready when flooding occurs.

Port Fairy flood 1946

About Flood Warnings

About flood warnings

Flood Watches and **Weather Warnings** are issued by the Bureau of Meteorology (BoM) to tell people about possible flooding.

A **Flood Watch** means there is a developing weather pattern that might cause floods in one or two days. A Flood Watch will be cancelled if it is no longer a threat.

The Victoria State Emergency Service (SES) will give information about how the floodwater might affect people and properties. This includes safety messages to remind you what to do.

Severe Thunderstorm Warnings

Thunderstorms are classified as severe, due to their potential to cause significant localised damage through: wind gusts, large hail, tornadoes or flash flooding. Severe thunderstorm warnings are issued to the community by the Bureau of Meteorology.

Severe Weather Warnings

These warnings are issued to the community by the Bureau of Meteorology when severe weather is expected that is not directly related to severe thunderstorms and bushfires. Examples of severe weather include damaging winds and flash-flooding.

Flash Flooding happens quickly. There may be little or no warning. The arrival time or depth of a flash flood can usually not be predicted.

Listen to Severe Thunderstorm and Severe Weather warnings for your area. If you hear a warning, check the Bureau of Meteorology and Victoria State Emergency Service for warnings and advice.

Flash flooding occurs because rain falls faster than the ground has the ability to absorb, causing water run-off into low-lying areas and into local drainage systems unable to cope with the volume of water. This results in water rising rapidly and flowing powerfully and quickly.

Flash flooding:

- Occurs so fast that it is often difficult to provide a detailed warning. Often it arrives without warning.
- Usually results from heavy rainfall falling during severe storms over a short time.

Know your Local Environment

If you live in the area, keep an eye on the weather, especially heavy rainfall or sustained rainfall over a number of days. Knowing your local area and making your own observations are a great tool to help you prepare for a potential flood. Keep an eye on local river and creek heights.

Remember, you may not receive any official warning.

Emergency assistance may not be immediately available. Be aware of what is happening around you to stay safe.

Never wait for a warning to act.

Emergency Alert

SES may provide alerts to the Port Fairy community through the Emergency Alert telephone warning system. All Emergency Services can use Emergency Alert to warn communities about dangerous situations by voice message to landline telephones or text message to mobile phones.

If you receive a warning, make sure that all family members, people at work and your neighbours are aware of the situation.

If you receive an Emergency Alert you should pay attention and act. It could mean life or death.

If you need help to understand a warning, ask a friend, neighbour or family member.

Warnings for Port Fairy

The Bureau of Meteorology does not issue river height predictions for Port Fairy.

Weather Warnings and Flood Watches issued by the Bureau will provide information about when flooding is possible.

If flooding is likely, tune into emergency broadcasters to watch and listen for information relating to the:

- Moyne River
- Murray Brook
- Reedy Creek
- Glenelg Hopkins Catchment
- South West weather district.

Information about potential floods will also be available from the SES. You can monitor rainfall and river levels on the Bureau of Meteorology website.

The Toolong Gauge is not monitored by the Bureau of Meteorology but can still provide you with an indication of what you might experience during a flood (*Moyne River Flood Levels at the Toolong Gauge*).

NOW - before a flood

- Check if your home or business is subject to flooding. For more information, contact Moyne Shire Council.
- Develop an Emergency Plan.
- Check if you could be cut off by floodwater.
- Know the safest way to go if you decide to leave your property and plan an alternative route.
- Check your insurance policies to ensure your equipment, property and business are covered for flood damage.
- Keep a list of emergency numbers near the telephone.
- Put together an Emergency Kit.

When a flood is likely

- Take action. Follow your Emergency Plan.
- Listen to your radio for information and advice.
- Check your neighbours are safe and know about the flood.
- Stack possessions on benches and tables with electrical goods in the highest places.
- Anchor objects that are likely to float and cause damage.
- Move rubbish bins, chemicals and poisons to the highest place.
- Put important papers, valuables, photos and other special personal items into your Emergency Kit.
- Business owners should raise stock, business records and equipment onto benches and tables.
- Rural property owners should move livestock, pumps and machinery to higher ground.
- If you are likely to be isolated, have enough food, drinking water, medicine, fuel and other needs to last at least three days.
- Do not forget pet food and stock feed.

The time for me to evacuate is before:

Your Emergency Plan

Emergencies can happen at any time, with little warning. People who have planned and prepared for emergencies have reduced the impact and recovered faster.

Taking the time to think about emergencies and make your own plan helps you think clearly and have more control to make better decisions when an emergency occurs.

Your Emergency Plan should identify:

- The types of emergencies that might affect you.
- How those emergencies might affect you.
- What you will do before, during and after an emergency.
- Where to get more information.
- Where you will go if you evacuate and the best way to go in different circumstances.
- A list of phone numbers you will need, including emergency services, your insurance company, friends and family.

Visit www.ses.vic.gov.au to obtain a copy of your Home Emergency Plan workbook

Evacuation

Victoria Police is responsible for coordinating an evacuation in an emergency. During a flood, Police, SES and other emergency services may advise you to evacuate to keep you safe. It is important that you follow this advice.

There are two types of evacuation notices that may be issued via your emergency broadcaster during a flood:

- **Prepare to evacuate** - means you should act quickly and take immediate action to protect your life and property. You should prepare to leave.
- **Evacuate immediately** - you must leave immediately as there is a risk to lives.

Remember you can leave at any time if you feel unsafe. You do not need to wait to be told to evacuate.

Emergency Kit

Every home and business should have a basic emergency kit:

Check your kit often. Make sure things work. Replace out of date items.

When a warning is issued, have ready for use or pack into your kit:

I need to add:

Write your list here. Tick items as you pack them into your kit.

- Special needs _____

During and After a Flood

Never
Drive, Ride or Walk
Through Floodwater

During a flood

When flooding has begun:

- **Never drive, ride, swim or walk through floodwater.**
- **Floodwater can be deep and damage roads and bridges.**
- **Do not let your children play or swim in floodwater.**
It is dirty, dangerous and deadly.
- Tune in to your emergency broadcasters: ABC Local Radio, Commercial Radio, designated Community Radio Stations and SKY NEWS Television.
- In life-threatening emergencies, call 000 (triple zero).
- **For emergency help from the SES in floods and storms call 132 500.**
- Stay away from all waterways including drains and culverts.
- Stay away from fallen power lines – electricity travels easily through water.
- Be aware that animals, snakes, rats, spiders and other pests may be on the move during a flood - they can come into houses and other buildings or hide around sandbags.
- Keep in contact with neighbours.
- Be prepared to leave early.

When you leave early or evacuate:

- Leaving early is always the safest option, leave well before roads are closed by floodwater.
- Take your emergency kit and three days supply of clothing with you.
- Turn off the electricity, gas and water as you leave.
- Take your pets with you. Do not leave them behind. Dogs should be muzzled and cats caged.
- Go to a relief centre or to stay with friends or family in higher areas.

If activated, Relief Centres can help you with:

- Temporary accommodation
- Financial help
- Personal support
- Drinks and meals
- Basic clothing and personal needs
- Help to contact family and friends.

If you choose to shelter with a friend or relative, tell authorities where you are staying.

After a flood

Flood dangers do not end when the water begins to fall.

To make sure you stay safe:

- Keep listening to local emergency broadcasters.
- Do not return home until advised that it is safe.

Once you return to your home:

- Drink bottled water or boil all drinking water until advised that the water supply is safe.
- Throw away any food or medicines that may have been in contact with floodwater or affected by power outages.
- When entering the building, use a torch to light your way - never use matches, cigarette lighters or any other flame as there may be gas inside.
- Keep the electricity and gas off until checked and tested by a professional.
- Take photographs of all damage for insurance.
- Clean your home straight away to stay healthy.

How SES helps the community

The Victoria State Emergency Service (SES) is a volunteer based emergency service. Although our SES volunteers attempt to reach everyone prior to or during an emergency, at times this is not possible. Therefore it is advisable for you to be prepared for emergencies so that you can share responsibility for your own wellbeing during those times. In a flood, SES assistance may include:

- Giving flood advice
- Protecting essential services
- Helping to protect infrastructure
- Rescuing people from floodwater
- Advising of an evacuation.

To assist your preparation, it is recommended that you obtain a copy of a SES Home Emergency Plan by visiting www.ses.vic.gov.au.

Emergency Checklist

NOW: Flood preparation

- Check if your insurance policies cover flooding.
- Keep this list of emergency numbers near the telephone.
- Put together an Emergency Kit and prepare a home or business Emergency Plan, see www.ses.vic.gov.au.

When you hear a Flood Watch or weather warning

- Listen to severe weather warnings for flash flood.
- Listen to radio and check the SES website for more information and advice.
- Go over your Emergency Plan. Pack clothing and other extra items into your Emergency Kit and take this with you if you evacuate.

When flooding may happen soon (a Flood Warning)

- Make sure your family members and neighbours are aware of what is happening.
- Be ready to evacuate. Act early, conditions change rapidly, roads and escape routes can be covered or blocked. Don't forget to take pets and your medicine with you.
- Put household valuables and electrical items as high as possible.
- Turn off water, gas and electricity at the mains.
- Secure objects likely to float and cause damage. Raise chemicals and oils well above the predicted flood height.
- Move pumps, machinery, hay and livestock to higher ground.

During the flood

- For emergency assistance, call 132 500 for SES.
- DO NOT drive, ride, swim or walk through floodwater. This is the main cause of death during floods.
- NEVER allow children to play in floodwater. This is the main cause of death during floods for children and young people.
- Stay away from drains, culverts and waterways, water can flow quickly and have strong currents.
- Stay well clear of fallen trees, power lines and damaged buildings.

After the flood: recovery

- If your property has been flooded, check with Moyne Shire Council for information and advice.
- Have all electrical and gas equipment professionally tested before use.
