Local flood information

There have been 6 significant flood events in Lexton between 1999 and 2022.

The largest flood on record was in 2022 when the floodwater reached 4.88 metres at Lillicur gauge.

Flooding can happen within minutes, giving people little to no time to prepare and take action.

Why does Lexton flood?

Lexton is at risk of both **riverine flooding** and **flash flooding**, which can happen separately or at the same time. Both are usually caused by heavy rainfall.

Riverine flooding

This happens when the Burnbank Creek, Lexton Creek rises and overflows their banks, and spills water onto land. The most common cause is prolonged heavy rainfall.

- Lexton is built around the Burnbank Creek and parts of the town are on the floodplain, the naturally low-lying areas more likely to be impacted in a flood.

Flash flooding

This type of flooding can happen quickly and you may not receive an official warning. Although these floods only last a short time, they can cause severe damage.

- The Burnbank Creek has a small catchment area which can cause rapid rises in the creek after local heavy rainfall leading to combined flash and riverine flooding.
- The ground may be unable to absorb the amount of rainfall naturally causing the water to pool.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

Check your home, work, and travel routes for floodwater

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See [page 7](#) for more information.

- This map shows the area likely to flood during a significant 1% Annual Exceedance Probability (AEP) flood event.
- A 1% AEP event means there is a 1% chance of this size flood (or greater) happening in any given year.

View an interactive version of this map using North Central Catchment Management Authority's portal called [Flood Eye](#), see [page 6](#) for more details.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below provides an idea of what to expect for different flood sizes.

Minor impacts

- Water spilling over creek banks and nearby low lying areas.
- Water coming up through drains in nearby streets.
- Cover minor paths, tracks, and low level bridges.
- Some back yards impacted and buildings impacted below floor level

Moderate impacts

- Water spilling over creek banks and covering larger areas of land.
- Water above floor level in some houses and buildings.
- Evacuation may be required in some areas.
- Impact to roads and traffic routes.

Major impacts

- Widespread flooding.
- Many houses and businesses are inundated above floor level.
- Properties and whole areas may be isolated.
- Major roads and rail routes closed.
- Require many evacuations.
- Impact to utility services (water, power, sewerage)

Previous flood impacts

While floods can vary, understanding the impacts of past events can assist in anticipating the effects of future flooding.

October 2022 flood event

The October 2022 flood event was caused by intense rainfall that led to waterways, including the Burnbank Creek overflowing and inundating parts of the township.

- A total of 94 millimetres of rain fell over 4 days.
- 4 buildings experience above-floor-level flooding.
- Multiple roads were impacted by flooding including Sunraysia Highway, Lexton-Ararat Road and Williamson Street, causing isolation.

Goldsmith Street (facing South) 2022

Download your free Property Flood Report

[Flood Eye](#), developed by the North Central Catchment Management Authority, is a tool for residents and businesses to assess their flood risk.

- Use the portal to zoom in on your property and see if it's likely to be affected in a large flood event.
- Download a free property report to help you plan for future floods.

Go to floodreports.nccma.vic.gov.au.

*Note this tool is not designed to be used during a flood event and does not provide information for current floods.

In a flood emergency, stay informed through [VicEmergency](#), see [page 8](#) for more information.

What roads are likely to flood?

During a flood, the roads listed below may flood and could be closed.

- For current road closures, check [VicTraffic](#).
- [VicEmergency](#) may include road closures in its warnings, see [page 8](#) for more information.

Stay safe by never driving through flood water. It can take just 15cm of flowing water to float a car, that's the height of an average pen.

Your local services

Catchment Management Authority

For property specific flood and development advice before a flood event.

- **North Central Catchment Management Authority**
nccma.vic.gov.au | 03 5448 7124

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.
youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- ☐ Keep gutters and drains clear of debris including leaves and any other items.
- ☐ Check your building and contents insurance, what kind of flooding does it cover?
- ☐ Move your valuable possessions up high.
- ☐ Back up important files and documents to a cloud storage or USB kept elsewhere.
- ☐ Identify higher ground on or around your property, away from the danger area.
- ☐ Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

TV | Sky News

If you expect floodwater at your property

1

Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

For more details and other tips, visit:

ses.vic.gov.au/flood

Sandbagging

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

Plastic Sheeting

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel and hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centres.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
