Local flood information

	<p>The Gippsland Lakes have a history of flooding, including in Hollands Landing.</p>		<p>In June 2007, 300mm of rainfall in the Gippsland Lakes resulted in lake levels rising 1.3 metres above normal levels, flooding many homes.</p>		<p>Flooding typically occurs one to three days after the rivers have experienced flooding with peaks slow to rise and recede.</p>
--	---	--	---	--	---

Why does Hollands Landing flood?

When the Gippsland Lakes overflow their banks, and spill water onto land, it causes **riverine flooding**. The most common cause of this is prolonged heavy rainfall.

- Hollands Landing is built around the Gippsland Lakes between the west end of Lake Victoria, Lake Wellington and McLennan Strait and most of the town is on the flood plain, the naturally low-lying areas more likely to be impacted in a flood.
- The Latrobe, Macalister, Avon, Mitchell, Nicholson and Tambo Rivers all flow into the Gippsland Lakes. Flooding of these rivers can cause flooding of Gippsland Lakes which will impact the Hollands Landing area.
- Low-lying areas in the Gippsland Lakes at Hollands Landing may flood due to storm surges caused by strong winds and low pressure during storms, resulting in an abnormal rise in water levels at Lake Victoria and the Gippsland Lakes.
- Abnormally high tides are a natural and predictable exceptionally high tide where the ocean meets the land. They may cause or add to existing flooding.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below table provides an idea of what to expect at different flood heights.

- **Before a flood:** Use the floodwater heights in the table to help you decide when you will need to act to protect yourself and your property in a flood event.
- **During a flood:** When a warning is issued by [VicEmergency](#), use the predicted floodwater height and warning information to understand what the potential impacts may be for you and your community.

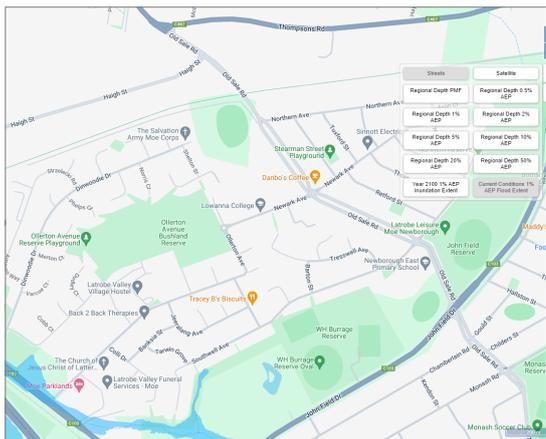

Floodwater Height (metres)*	Potential impacts and previous flood events [^]
2.0m	1% Annual Exceedance Probability (AEP) height, see page 4 .
1.20m	2007 flood level <ul style="list-style-type: none"> ■ Areas of Gippsland recorded more than 120mm of rainfall in 24 hours. ■ 16 people were isolated within the Hollands Landing Caravan Park. ■ Hollands Landing was isolated for up to 14 days.
1.08m	2012 flood level <ul style="list-style-type: none"> ■ Residents of Hollands Landing were asked to evacuate. ■ Hollands Landing Road and the town was isolated for up to 4 days.
1.0m	<ul style="list-style-type: none"> ■ Hollands Landing Road is flooded at the north end of town, isolating the Hollands Landing township. ■ Lake View Caravan Park is completely flooded. ■ Most properties in Hollands Landing experience flooding.
0.9m	Major flood level <ul style="list-style-type: none"> ■ All properties on Le Grande Avenue are now isolated from the rest of Hollands Landing. ■ Most roads in Hollands Landing are flooded. ■ Residents who need to evacuate will need to before Hollands Landing Road closes due to floodwater.
0.8m	<ul style="list-style-type: none"> ■ Low-lying properties on Hollands Landing Road, Deegan Avenue, Lyrebird Avenue and Government Road will experience flooding.
0.7m	Minor flood level <ul style="list-style-type: none"> ■ The Lakeview Caravan Park will experience flooding. ■ Deegan Avenue, View Hill Road, Kangaroo Road and Bettong Road will experience flooding.
0.2m	Average tidal range
0.00m	

*The height measurement is at the [Mclennan Straight at Hollands Landing](#) gauge.

[^]This table includes information from previous flood events and flood studies, which are scientific models used to predict impacts at different flood heights and flows.

View flood information for your property

The [Community Flood Portal](#), developed by the West Gippsland Catchment Management Authority, is a tool for residents and businesses to assess their flood risk.

- Use the portal to zoom in on your property and see if it's likely to be affected in a large flood event.

Go to flood.wgcma.vic.gov.au.

In a flood emergency, stay informed through [VicEmergency](#), see [page 7](#) for more information.

Your local services

Catchment Management Authority

For flood advice and information on flood levels or depths when developing your property.

- **West Gippsland Catchment Management Authority**
wgcm.vic.gov.au | 03 5175 7800

Local Council

For relief and recovery support after a flood event.

- **Wellington Shire Council**
wellington.vic.gov.au | 1300 366 244

Hollands Landing, 2007. *Victoria State Emergency Service.*

Floodwater can be very deep, rise quickly and move fast.
Stay safe by avoiding flooded areas.

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.

youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- Keep gutters and drains clear of debris including leaves and any other items.
- Check your building and contents insurance, what kind of flooding does it cover?
- Move your valuable possessions up high.
- Back up important files and documents to a cloud storage or USB kept elsewhere.
- Identify higher ground on or around your property, away from the danger area.
- Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

ses.vic.gov.au/flood

What to do in a flood emergency

When to call VICSES

 **Flood emergency assistance call VICSES 132 500**

 **If life threatening call triple zero 000**

Stay Informed

VicEmergency

Emergency warnings will provide information on what is happening and advice of what you should do.

You may not receive an official warning before a flood.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency @vicemergency

- Set-up a watch zone for alerts for your area.

Bureau of Meteorology

Monitor rainfall, river levels, weather forecasts/warnings.

bom.gov.au/vic/flood/west_gippsland.shtml

Emergency broadcasters

Radio | ABC 828AM or 100.7FM, TR FM 99.5

TV | Sky News

If you expect floodwater at your property

1

Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

For more details and other tips, visit:

ses.vic.gov.au/flood

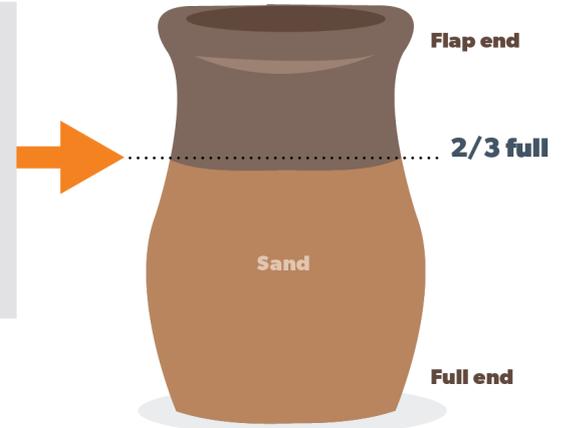

Sandbagging

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

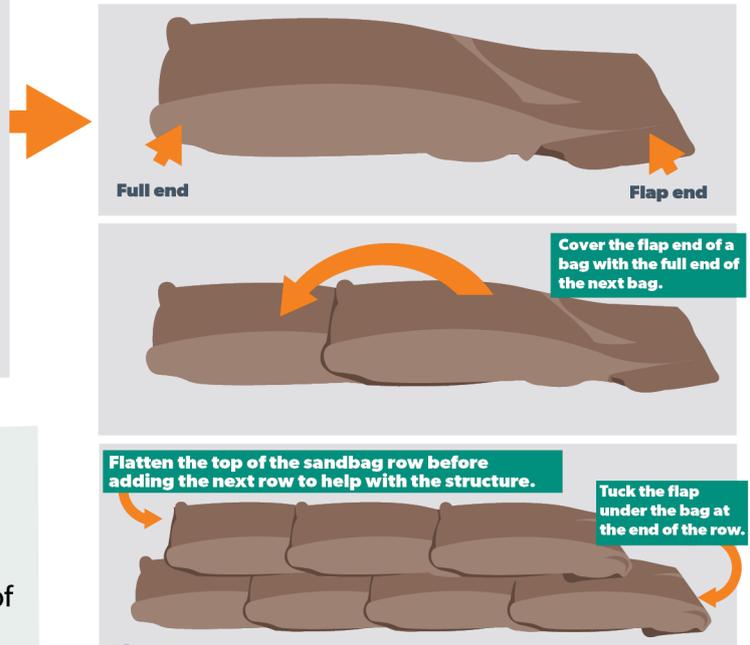

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

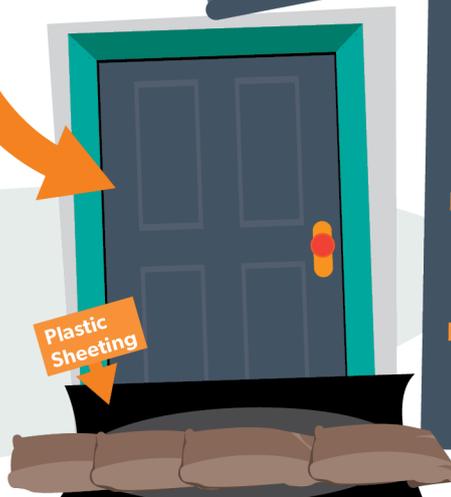

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

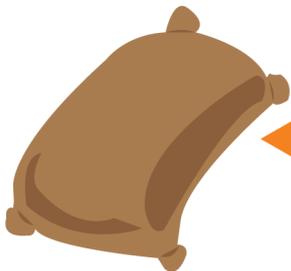

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel and hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centres.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

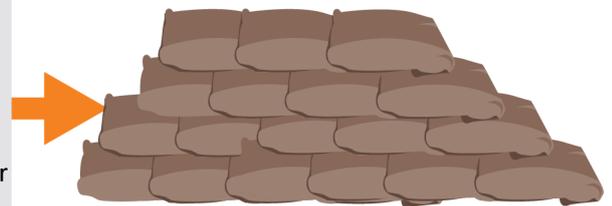

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
