Local flood information

There have been 3 significant flood events in Rosedale between 1934 and 1993.

In 1993, 300mm of rainfall fell over the Strzelecki Ranges resulting in major flooding at Blind Joes Creek affecting Rosedale.

Flooding can happen after approximately 150mm of rain over a short period, giving people little to no time to prepare and take action.

Why does Rosedale flood?

Rosedale is at risk of both **riverine flooding** and **flash flooding**, which can happen separately or at the same time. Both are usually caused by heavy rainfall.

Riverine flooding

This happens when rivers or creeks rise and overflow their banks and spill water onto land and impacting the floodplain, the naturally low-lying areas of the township.

Riverine flooding can occur during:

- Flooding of the Latrobe River or Blind Joe's Creek.
- Flooding of the Latrobe, Thomson or Macalister can restrict the flow of Blind Joe Creek.

Flash flooding

This type of flooding can happen quickly and you may not receive an official warning. Although these floods only last short time, they can cause severe damage.

Flash flooding can occur during:

- Intense rainfall around the Strzelecki Ranges flowing into Blind Joe's Creek and smaller creeks south of Rosedale.
- Stormwater drains and culverts may not be able to drain the amount of rainfall, causing them to overflow.

How does Rosedale flood?

The most severe flood impacts to the Rosedale township are experienced when the Latrobe River **and** Blind Joe's Creek occur at the same time, resulting in widespread flooding affecting most of the Rosedale township.

Rosedale township can experience widespread flooding when the Strzelecki Ranges receives 150mm, flooding Blind Joe's Creek and smaller tributaries.

Rosedale experiences limited impacts as a result of Latrobe River flooding alone due to the Latrobe floodplain containing the floodwater.

Impacts as a result of Latrobe River flooding alone are at Queen Street, Mackay Street, Allen Court and Mill Lane.

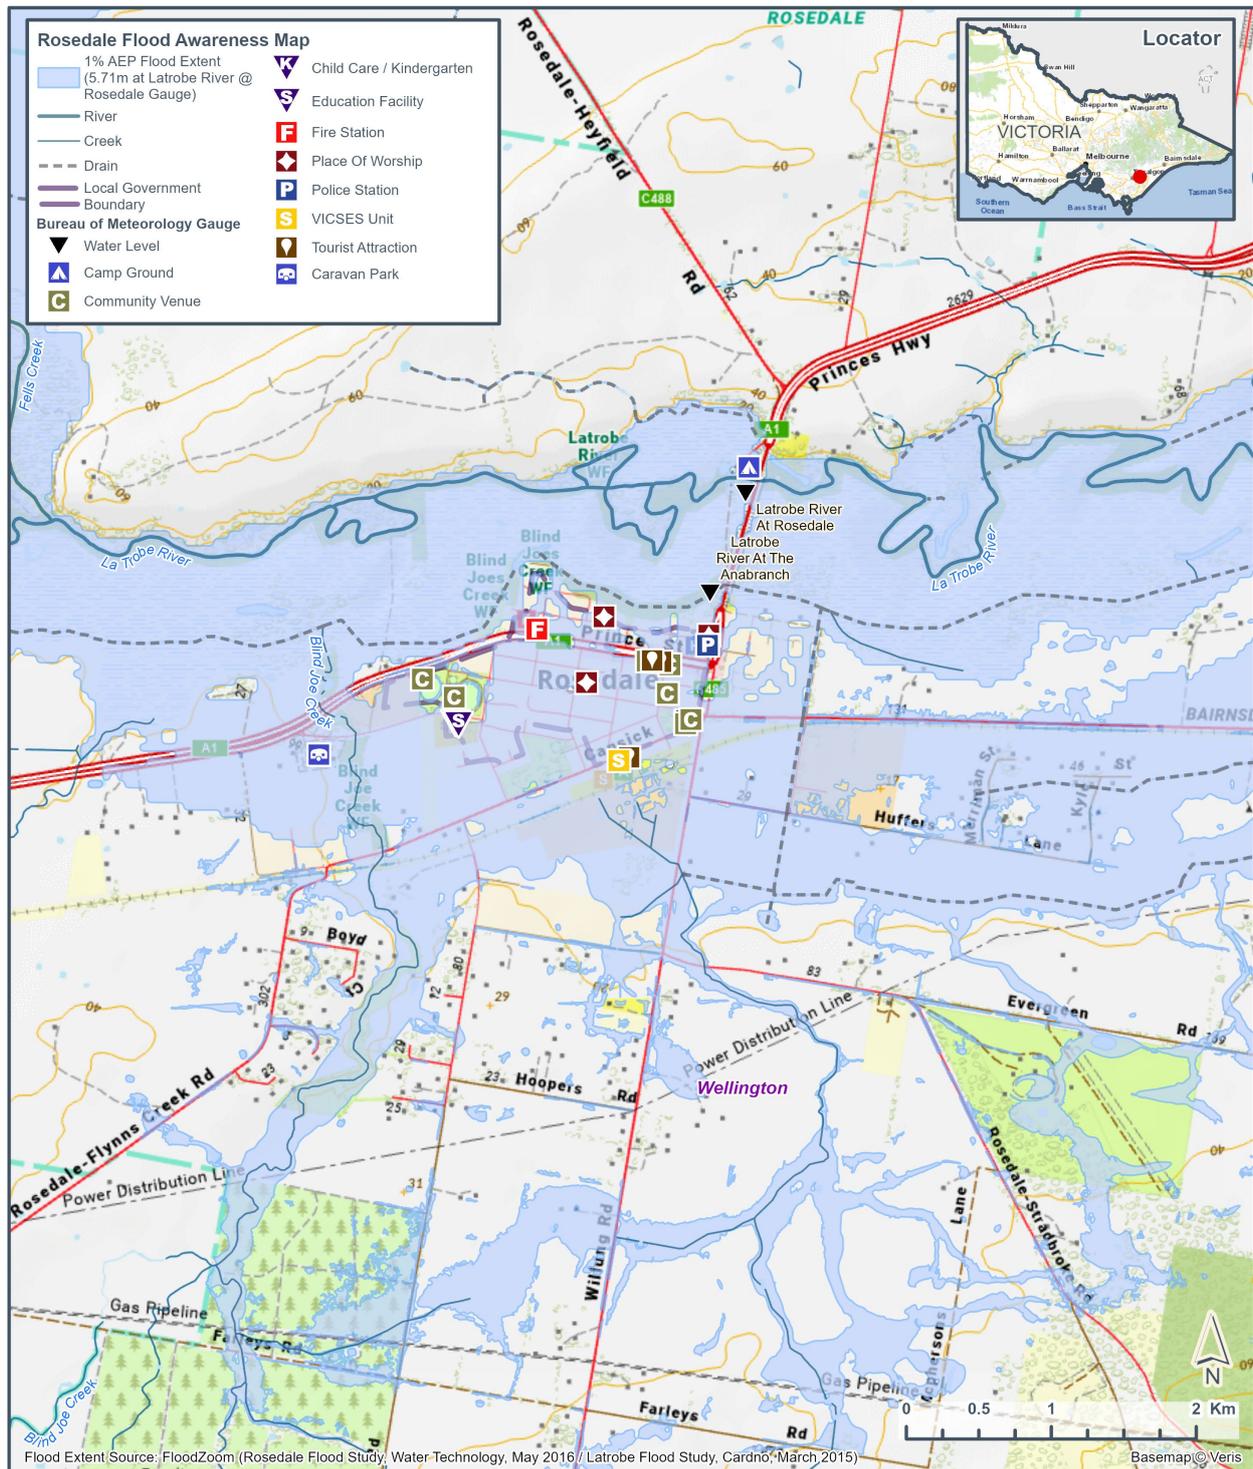

Check your home, work, and travel routes for floodwater

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See [page 7](#) for more information.

- This map shows the area likely to flood in a significant flood when the Latrobe River rises to 5.17m at the Latrobe River at Rosedale gauge and when Blind Joe's Creek also experiences a 1% AEP Flood.
- This is referred to as a 1% Annual Exceedance Probability (AEP), which means there is a 1% chance of this size flood (or greater) happening in any year.

View an interactive version of this map using West Gippsland Catchment Management Authority's [Community Flood Portal](#), see [page 6](#) for more information.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below table provides an idea of what to expect at different flood heights.

- **Before a flood:** Use the floodwater heights in the table to help you decide when you will need to act to protect yourself and your property in a flood event.
- **During a flood:** When a warning is issued by [VicEmergency](#), use the predicted floodwater height and warning information to understand what the potential impacts may be for you and your community.

Floodwater height* (metres)	Potential impacts^
5.71m	1% AEP Flood, flood height shown on map page 4
5.50m	Major flood level The previously mentioned Rosedale and surrounding areas experience a rise in floodwater depth and to a greater extent.
5.21m	October 1953 flood event Mill Lane will be closed.
5.12m	Properties within the Rosedale township have the potential to be isolated within their properties due to floodwater affecting roads. Areas of the Rosedale township previously mentioned continue to experience rises and a further extent of floodwater.
4.8m	Moderate flood level
4.8m	June 2021 flood event Low lying areas of Queen Street, Cricket Street Mackay Street and Mill Lane may be affected by floodwater. Properties at Lyons Road, Cansick Street, Hood Street, Latrobe Street, Queen Street, Rowley Court, Macleod Court and some surrounding streets are affected by floodwater.
4.74m	September 1993 flood event
4.00m	Minor flood level <ul style="list-style-type: none"> Willow Park Campground is evacuated and closed due to flooding. Rosedale Caravan Park and low lying recreational areas may experience flooding. Low-lying areas of Mill Lane and the floodplain surrounding Rosedale experience flooding.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

During larger flood events

Although no two floods are the same and the environment is constantly changing, the below provides an idea of what to expect for a flood larger than a major flood event:

- Widespread flooding.
- Many houses and businesses are inundated above floor level.
- Properties and whole areas may be isolated.
- Major roads and rail routes closed.
- Many evacuations required.
- Impact to utility services (water, power, sewerage)

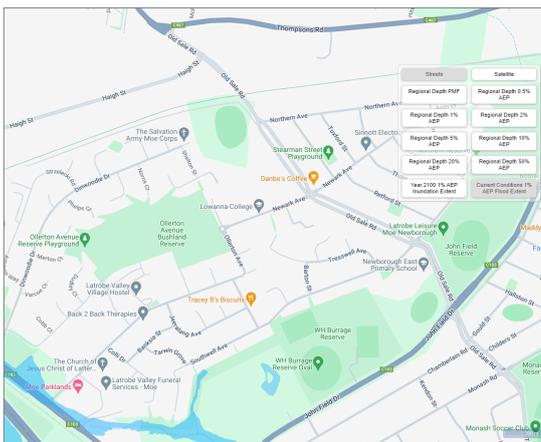

What roads are likely to flood?

During a flood, the roads listed may flood and could be closed.

For current road closures, check [VicTraffic](#). [VicEmergency](#) may include road closures in its warnings, see [page 8](#) for more information.

View flood information for your property

The [Community Flood Portal](#), developed by the West Gippsland Catchment Management Authority, is a tool for residents and businesses to assess their flood risk.

- Use the portal to zoom in on your property and see if it's likely to be affected in a large flood event.

Go to flood.wgcma.vic.gov.au.

In a flood emergency, stay informed through [VicEmergency](#), see [page 8](#) for more information.

Your local services

Catchment Management Authority

For general advice about flooding and controls based on planning zones and overlays.

- **West Gippsland Catchment Management Authority**
wgcm.vic.gov.au | 03 5175 7800

Local Council

For relief support after a flood event and general land use planning.

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

 Power bank	 Radio	 Drinking water
 Spare batteries	 Documents & records	 First aid kit
 Long life food	 Torch	 Gloves

Emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.
youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- Keep gutters and drains clear of debris including leaves and any other items.
- Check your building and contents insurance, what kind of flooding does it cover?
- Move your valuable possessions up high.
- Back up important files and documents to a cloud storage or USB kept elsewhere.
- Identify higher ground on or around your property, away from the danger area.
- Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

For more details and other tips, visit:
ses.vic.gov.au/flood

What to do in a flood emergency

When to call VICSES

 **Flood emergency assistance call VICSES 132 500**

 **If life threatening call triple zero 000**

Stay Informed

VicEmergency

Emergency warnings will provide information on what is happening and advice of what you should do.

You may not receive an official warning before a flood.

VicEmergency app

Radio | ABC Local 100.7 FM, 774 AM and 828 AM

TV | Sky News

If you expect floodwater at your property

1

Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

For more details and other tips, visit:

ses.vic.gov.au/flood

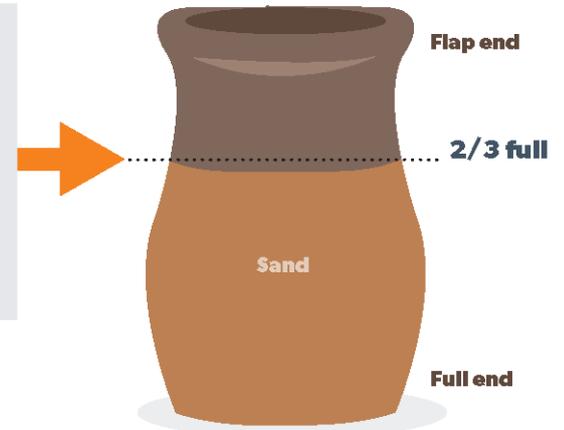

Sandbagging

Protecting your home

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

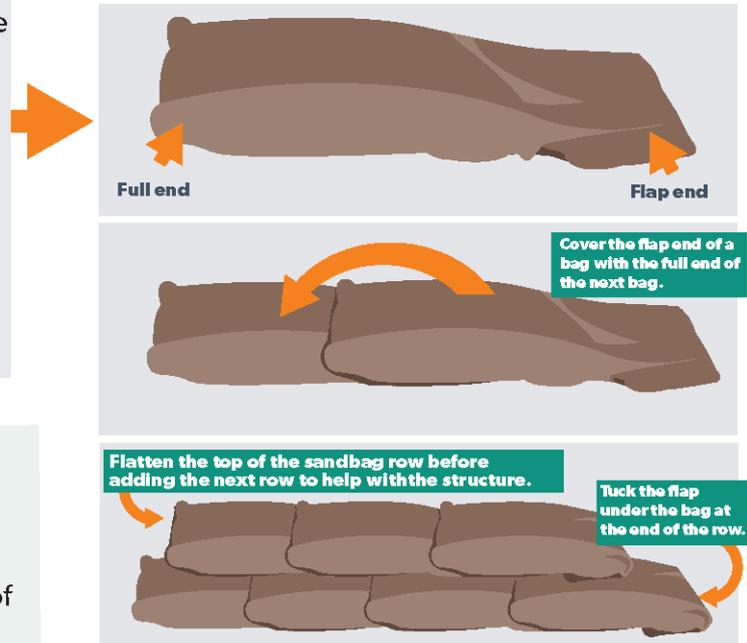

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel or hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centers.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

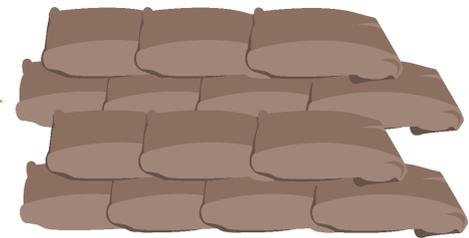

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water-resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
