## Local flood information

Mooroolbark has a history of flooding. Brushy Creek is the major waterway that runs through Mooroolbark.

The 2011 flood event was one of the most significant in the area, measuring 2.87 metres on the Brushy Creek Gauge.

Flooding can happen quickly after heavy rainfall, giving people little to no time to prepare and take action.

## Why does Mooroolbark flood?

Mooroolbark is at risk of both **flash flooding** and **riverine flooding**, which can happen separately or at the same time. Both are usually caused by heavy rainfall.

### Riverine flooding

- This happens when the Bushy Creek rises and overflows its banks, and spills water onto land.

### Flash flooding

This type of flooding can happen quickly and you may not receive an official warning. Although these floods only last short time, they can cause severe damage.

- As the land in the Mooroolbark area is a combination of both hilly and flat areas, sudden intense rainfall can lead to flash flooding.
- This type of flooding can happen quickly and you may not receive an official warning. Although these floods only last short time, they can cause severe damage.
- Bushy Creek is a relatively small waterway, which means that it can be quickly affected by heavy rain leading it to rise and fall quickly.

## How do floods impact communities?

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

## What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below provides an idea of what to expect for different flood sizes.

### Minor impacts

- Water spilling over river banks and nearby low lying areas.
- Water coming up through drains in nearby streets.
- Water will cover minor paths, tracks, and low level bridges.
- Some backyards and buildings impacted below floor level.

### Moderate impacts

- Water spilling over riverbanks and covering large areas of land.
- Water above floor level in some houses and buildings.
- Evacuation may be required in some areas.
- Impact to roads and traffic routes.

### Major impacts

- Widespread flooding.
- Many houses and businesses are inundated above floor level.
- Properties and whole areas may be isolated.
- Major roads and rail routes closed.
- Many evacuations required.
- Impact to utility services (water, power, sewerage).

## Previous flood impacts

While no two floods are the same, understanding the impacts of past floods can help you anticipate impacts of future flood events.

### 2011 Flood

- During the February 2011 flood event, floodwater reached 2.87 metres on the Brushy Creek Gauge.
- According to Yarra Ranges Council records, Mooroolbark was one of the seven heaviest locations affected by the floods in the municipality that day.

### 2019 Flood

- During the March 2019 flood event, a severe storm caused flash flooding across the east of Melbourne.
- 22 millimetres of rain fell in a short period of time in Mooroolbark. Hail also impacted the area.

## What roads are likely to flood?

During a flood, the roads listed below may flood and could be closed.

For current road closures, check [VicTraffic](#). [VicEmergency](#) may include road closures in its warnings, see [page 9](#) for more information.

- Bainbridge Court
- Brice Avenue
- Campbell Street
- Cardigan Road
- Carolanne Court
- Carronvale Road
- Croydondale Drive
- Dallas Court
- Esther Crescent
- Hawthory Road
- Hull Road
- Kathy Court
- Lorna Court
- Manchester Road
- McDermott Avenue
- Rachael Drive
- Ricky Court
- Wadsworth Street

**Stay safe by never driving through floodwater.** It can take just 15cm of flowing water to float a car, that's the height of an average pen.

## What areas are likely to flood?

During a flood, the community infrastructure listed below may be impacted in a flood and could be closed.

- Barneong Reserve
- Barneong Reserve Kindergarten
- Brice Avenue Reserve Community Centre
- Esther Park and Soccer Grounds
- Manchester Preschool
- Mooroolbark Plaza Shopping Centre
- Lilydale Railway Train Line near Mooroolbark Railway Station

## Your local services

### Catchment Management Authority

For general advice about flooding and controls based on planning zones and overlays.

- **Melbourne Water**  
[melbournewater.com.au](http://melbournewater.com.au) | 13 17 22

### Local Council

For relief support after a flood event and general land use planning.

- **Yarra Ranges Council**

# Plan and prepare for floods

## 1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app  
[emergency.vic.gov.au](https://emergency.vic.gov.au)  
1800 226 226

vicemergency

@vicemergency

## 2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit [redcross.org.au/prepare](https://redcross.org.au/prepare)
- Download the [Get Prepared](#) app

## 3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.

[youtu.be/XgyLnKDMkNo](https://youtu.be/XgyLnKDMkNo)

## 4 Reduce impacts to your property

- Keep gutters and drains clear of debris including leaves and any other items.
- Check your building and contents insurance, what kind of flooding does it cover?
- Move your valuable possessions up high.
- Back up important files and documents to a cloud storage or USB kept elsewhere.
- Identify higher ground on or around your property, away from the danger area.
- Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

# What to do in a flood emergency

## When to call VICSES

 **Flood emergency assistance call VICSES 132 500**

 **If life threatening call triple zero 000**

## Stay Informed

### VicEmergency

Emergency warnings will provide information on what is happening and advice of what you should do.

**You may not receive an official warning before a flood.**

VicEmergency app  
[emergency.vic.gov.au](https://emergency.vic.gov.au)  
1800 226 226

vicemergency @vicemergency

■ Set-up a watch zone for alerts for your area.

### Bureau of Meteorology

Monitor rainfall, river levels, weather forecasts/warnings.

[bom.gov.au/vic/flood/melbourne.shtml](https://bom.gov.au/vic/flood/melbourne.shtml)

### Emergency broadcasters

Radio | ABC 774 AM, Yarra Valley 99.1 FM

TV | Sky News

## If you expect floodwater at your property

1

### Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

### Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

### Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

### Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

### Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

## Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

[ses.vic.gov.au/flood](https://ses.vic.gov.au/flood)

# Sandbagging

**Sandbags won't stop the water completely, but can reduce the amount of water entering your home.**

## How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

## How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

## Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

### Block it

Toilets, bath and all drain holes

## What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

# Sandbags and sand

## Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

### What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel and hand scoop

### Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centres.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

### How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

### How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

### When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
