Local flood information

	<p>The Yarra Ranges area has a long history of flooding, with floods recorded as early as 1891.</p>		<p>Warburton has experienced flooding major flooding including in 1952 when water flowed through town.</p>		<p>Flooding can happen quickly after heavy rainfall, giving people little to no time to prepare and take action.</p>
--	---	--	--	--	--

Why does Warburton flood?

Warburton is at risk of both **riverine flooding** and **flash flooding**, which can happen separately or at the same time. Both are usually caused by heavy rainfall.

Riverine flooding

- Warburton is built along the Yarra River and parts of the town are on the floodplain, the naturally low-lying areas more likely to be impacted in a flood.
- When the area is flooding, East Warburton is most likely to be impacted by floodwater first. From here, the Yarra River flows right into the centre of Warburton, affecting areas surrounding the river.

Flash flooding

- Warburton can be impacted by flash flooding when heavy rain falls over a short period, and the ground is unable to absorb the amount of water, or stormwater drainage is full, naturally causing the water to pool.
- Due to the nature of the land and surrounding catchment, water flows through the town in times of flood can be extremely fast. Water levels can rise and fall rapidly, sometimes flooding areas without warning.

Although a landslide along the Yarra River is highly unlikely; there is a potential that in the event of a landslide, localised upstream flooding could occur in the Warburton Township.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

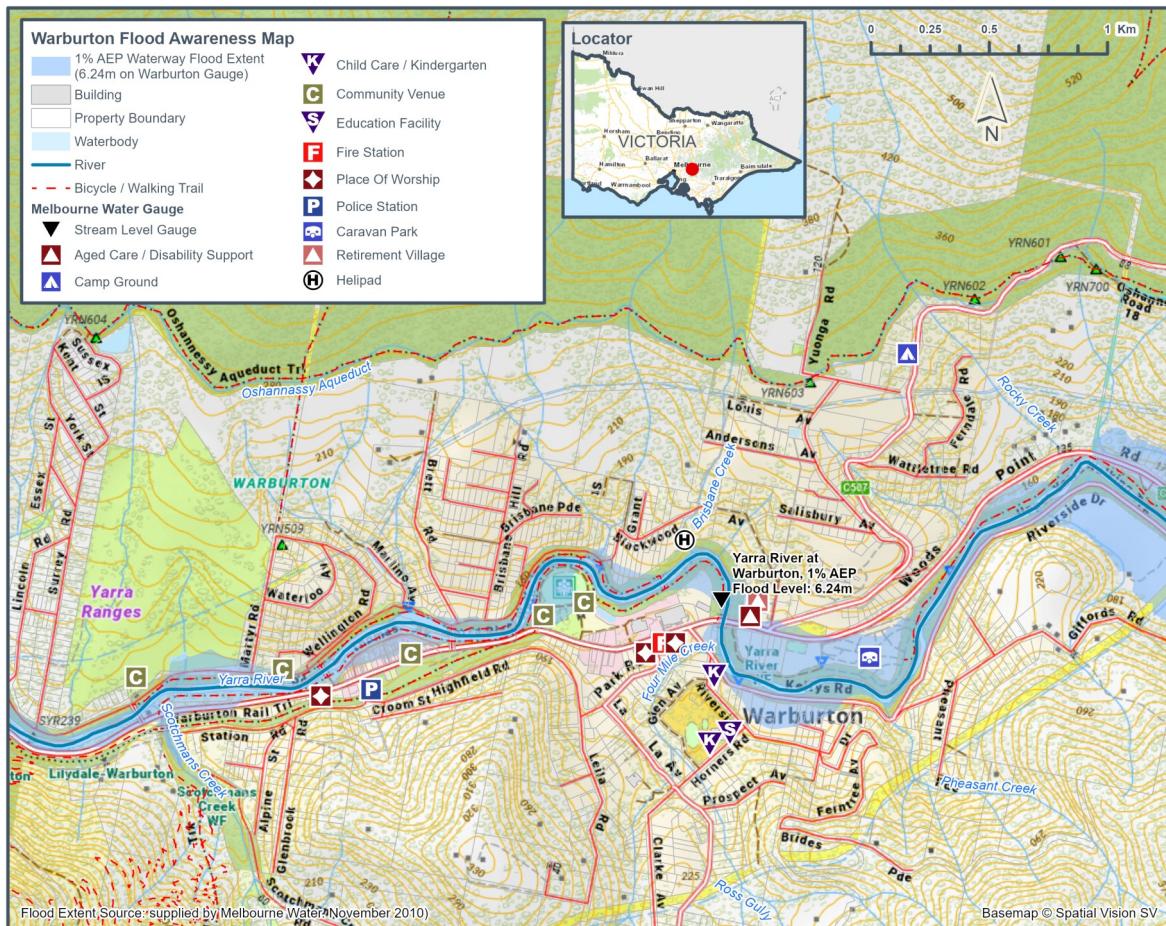

Sewage overflows inside building

Check your home, work, and travel routes for floodwater— Warburton

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See [page 8](#) for more information.

- This map shows the area likely to flood in a significant flood event.
- This is referred to as a 1% Annual Exceedance Probability (AEP), which means there is a 1% chance of this size flood (or greater) happening in any year.

What roads and areas are likely to flood?

During a flood, the roads and areas listed below may flood and could be closed.

- The Warburton Caravan and Parking Park, located on the north bank of the river.
- Warburton Highway in Launching Place
 - Whilst unlikely, if the flooding was severe enough, the Warburton Highway could be cut off affecting direct access to metropolitan Melbourne for a period of up to 72 hours.

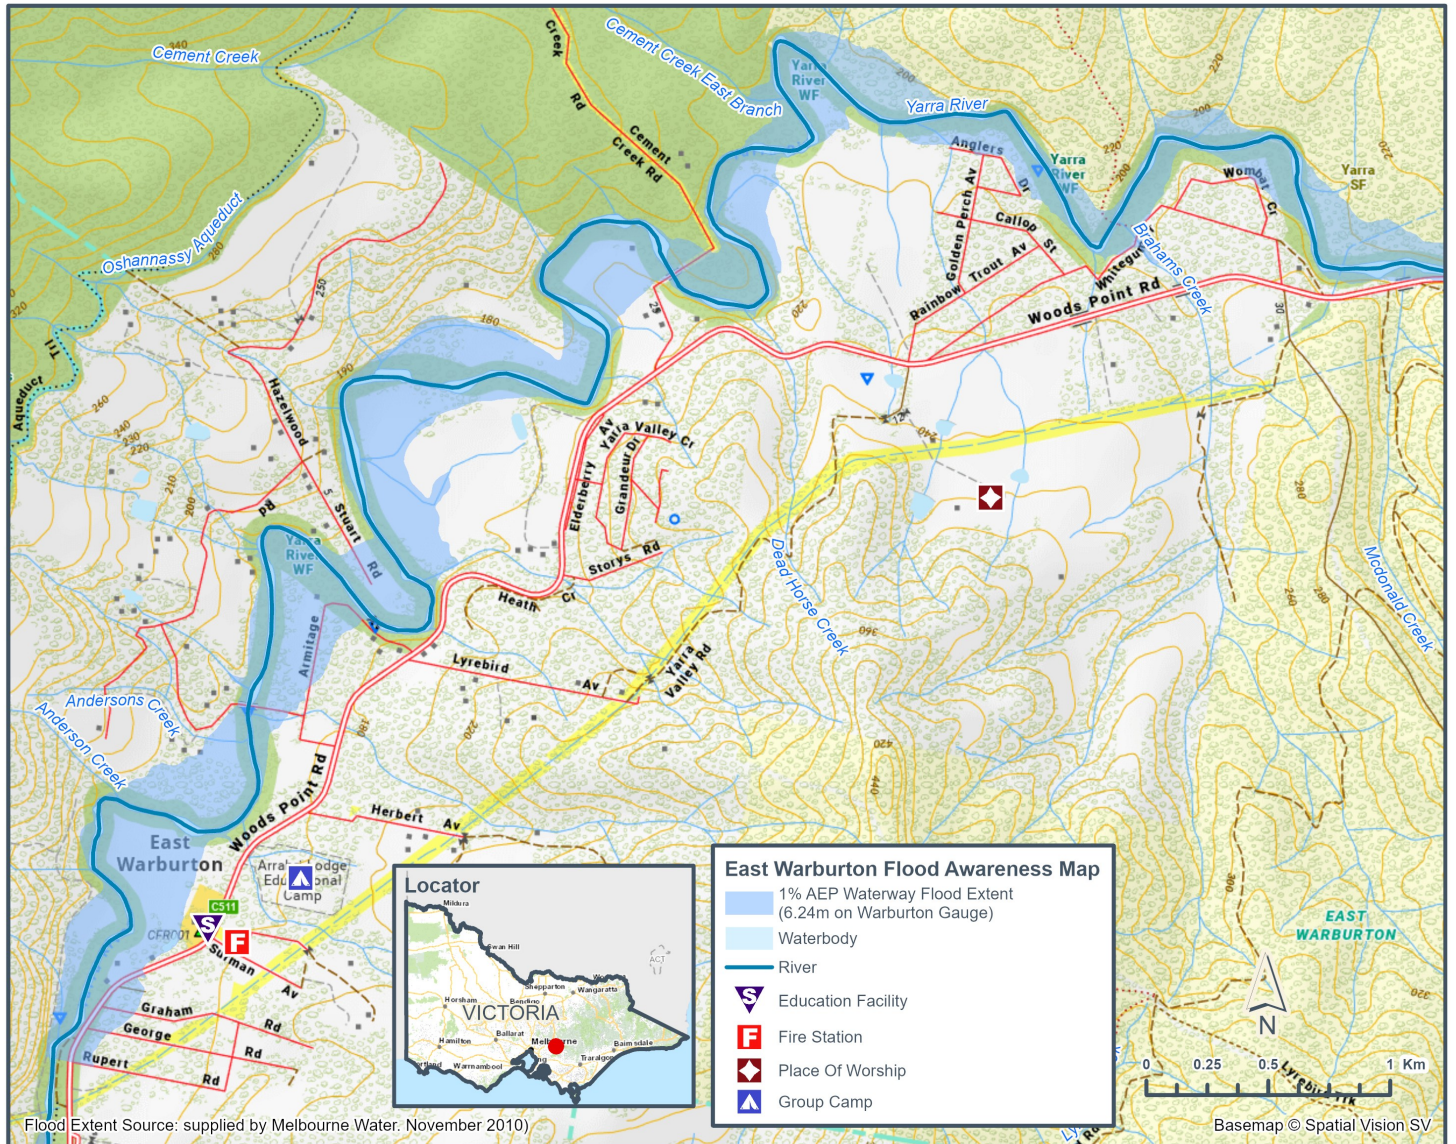

WARBURTON

- Acheron Way intersection
- Brett Road
- Dammans Road
- Kellys Road
- Riverside Drive
- Thomas Avenue
- Woods Point Road

Check your home, work, and travel routes for floodwater—East Warburton

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See [page 8](#) for more information.

- This map shows the area likely to flood in a significant flood event.
- This is referred to as a 1% Annual Exceedance Probability (AEP), which means there is a 1% chance of this size flood (or greater) happening in any year.

What roads are likely to flood?

During a flood, the roads and areas listed below may flood and could be closed.

- Armitage Avenue
- Cement Creek Road
- Hazelwood Road
- Whitegum Drive

Floodwater can be very deep, rise quickly and move fast.
Stay safe by avoiding flooded areas.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below table provides an idea of what to expect at different flood heights.

Floodwater height (metres) *	Potential impacts and previous flood events [^]
6.24 metres 1% AEP As shown on map on page 4 and page 5 .	82 properties may be impacted at this level. Community infrastructure that may be impacted by floodwater: <ul style="list-style-type: none"> ■ Warburton Caravan Park, Warburton ■ Warburton Reserve, Warburton ■ Sewer Pumping Stations at Dammons Road, Scotchmans Crescent, and Lincoln Road in Warburton ■ Sewer Emergency Relief Points at Thomas Avenue and Riverturn Lane in Warburton.
3.50 metres	Community infrastructure that may be impacted by floodwater: <ul style="list-style-type: none"> ■ Warburton Christian School, Warburton Highway ■ Warburton Sports Ground
3.0 metres	Community infrastructure that may be impacted by floodwater: <ul style="list-style-type: none"> ■ Yarra River walking trail at Warburton Christian School floods. Water over road: <ul style="list-style-type: none"> ■ Kellys Road, Warburton
2.56 metres 9 June 2021 flood peak level	Flood event summary: <ul style="list-style-type: none"> ■ Water World, Warburton flooded. ■ Warburton Holiday Park flooded.
2.0 metres	Community infrastructure that may be impacted by floodwater: <ul style="list-style-type: none"> ■ Warburton Holiday Park starts to flood.

*The height measurements is at the Warburton Gauge, Yarra River.

[^] This table includes information from previous flood events and flood studies which are scientific models used to predict impacts at different flood heights and flows.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below provides an idea of what to expect for different flood sizes.

Minor impacts

- Water spilling over river banks and nearby low lying areas.
- Water coming up through drains in nearby streets.
- Water will cover minor paths, tracks, and low level bridges.
- Some backyards and buildings impacted below floor level
- Riverside camp areas and some low lying caravan parks impacted.
- Relocation of stock required in some cases.

Moderate impacts

- Water spilling over riverbanks and covering large areas of land.
- Water above floor level in some houses and buildings.
- Evacuation may be required in some areas.
- Impact to roads and traffic routes.
- Relocation of stock required in some cases.

Major impacts

- Widespread flooding.
- Many houses and businesses are inundated above floor level.
- Properties and whole areas may be isolated.
- Major roads and rail routes closed.
- Many evacuations required.
- Impact to utility services (water, power, sewerage).

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.

youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- Keep gutters and drains clear of debris including leaves and any other items.
- Check your building and contents insurance, what kind of flooding does it cover?
- Move your valuable possessions up high.
- Back up important files and documents to a cloud storage or USB kept elsewhere.
- Identify higher ground on or around your property, away from the danger area.
- Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

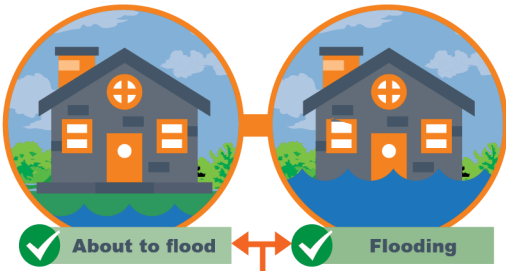

For more details and other tips, visit:
ses.vic.gov.au/flood

What to do in a flood emergency

When to call VICSES

 **Flood emergency assistance call VICSES 132 500**

 **If life threatening call triple zero 000**

Stay Informed

VicEmergency

Emergency warnings will provide information on what is happening and advice of what you should do.

You may not receive an official warning before a flood.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency @vicemergency

- Set-up a watch zone for alerts for your area.

Bureau of Meteorology

Monitor rainfall, river levels, weather forecasts/warnings.

Emergency broadcasters

Radio | ABC 774 AM, Yarra Valley 99.1 FM
TV | Sky News

If you expect floodwater at your property

1

Bag it
Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

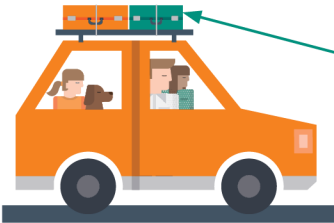

Block it
Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it
Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave
■ Leave **before** the flood arrives.

- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

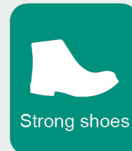

Phone & charger

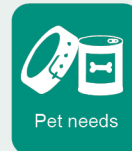

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

For more details and other tips, visit:
ses.vic.gov.au/flood

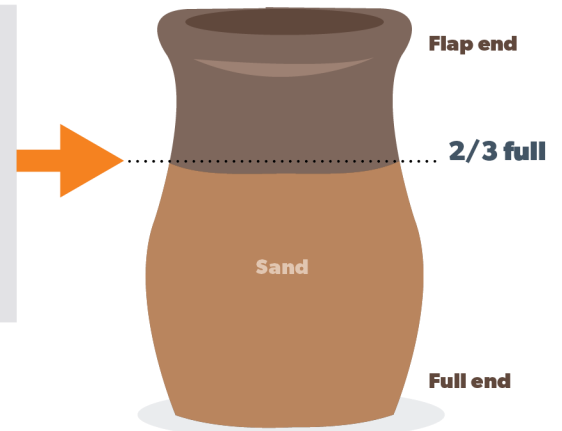

Sandbagging

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

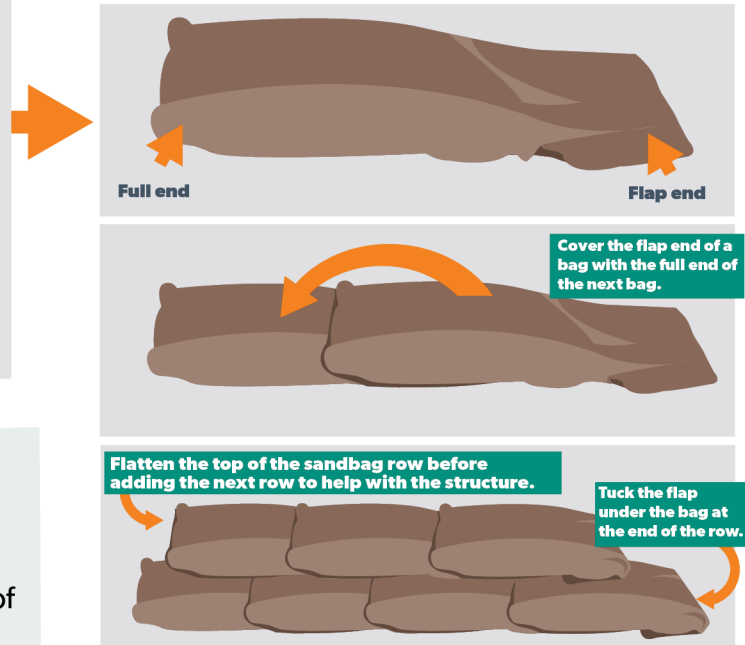

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

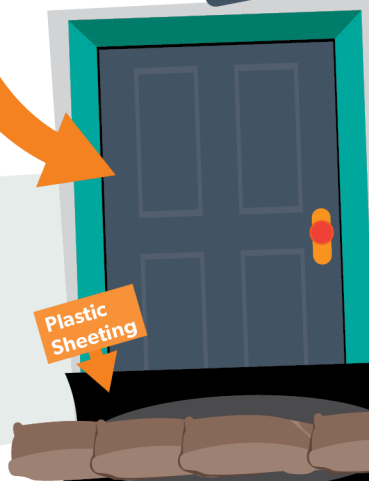

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

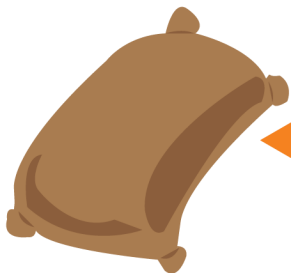

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel and hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centres.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

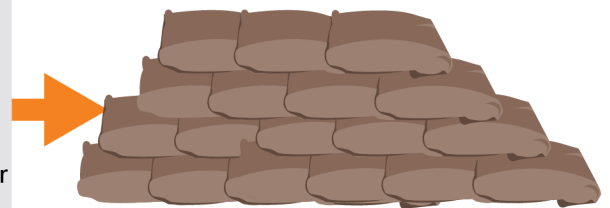

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.
