Local flood information

There have been 10 significant flood events in Inverleigh between 1909 and 2020.

The largest flood on record was in 1973 when the floodwater reached 5.34 metres at the Inverleigh gauge.

Flooding can happen within hours, giving people little to no time to prepare and take action.

Why does Inverleigh flood?

Inverleigh is at risk of both **riverine flooding** and **flash flooding** which can happen separately, or at the same time. Both are usually caused by heavy rainfall.

Riverine flooding

When the Leigh River and/or the Barwon River rises and overflows their banks, and spills out onto land, it causes **riverine flooding**.

- Inverleigh is located at the junction of the Leigh and Barwon Rivers and on a large floodplain, the naturally low-lying areas more likely to be impacted in a flood.

Leigh River: Usually floods after long heavy rainfall around Mount Mercer and Ballarat.

Barwon River: Usually floods after long heavy rainfall in the Otway Ranges.

Leigh & Barwon Rivers: If both rivers rise to their highest level and the water arrives in Inverleigh at the same time, the township is likely to flood.

Flash flooding

This can happen quickly and you may not receive an official warning. Although these floods only last short time, they can cause severe damage.

- Usually, this type of flooding only happens in the Inverleigh township.

How do floods impact communities?

Even if your home or workplace stays dry, floods can impact you in many ways.

Buildings flooded

Road closures

Drinking water supply and quality affected

Power outages

Mobile and internet network outage

Sewage overflows inside building

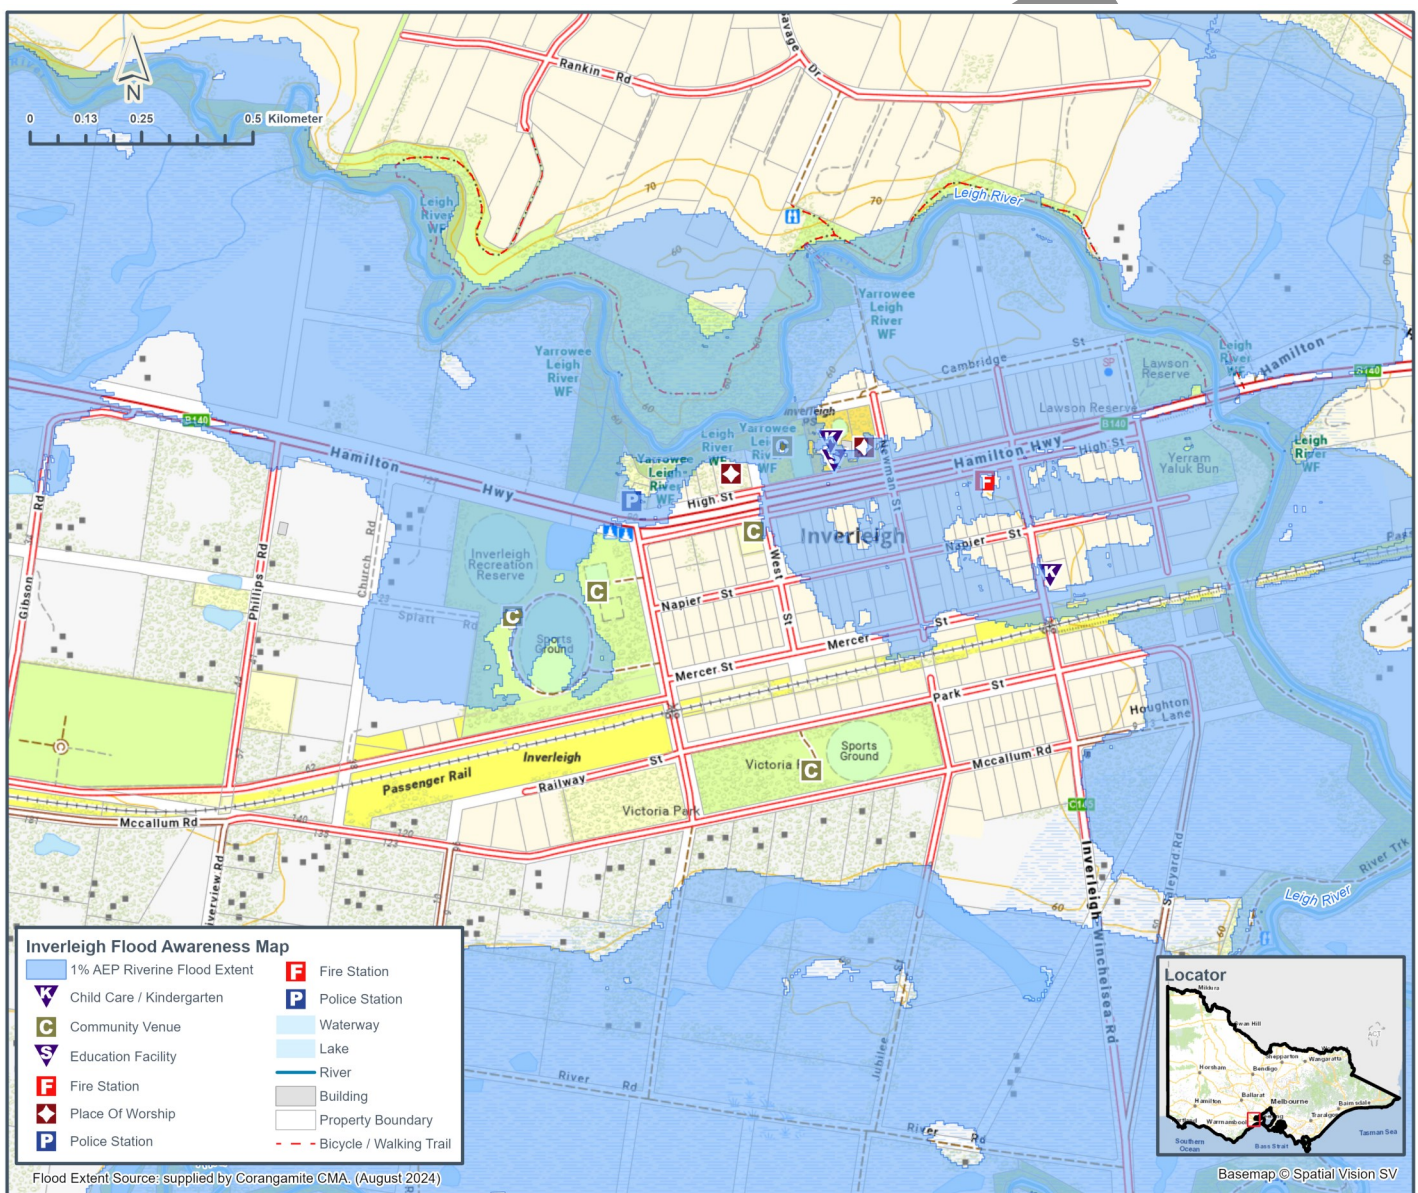

Check your home, work, and travel routes for floodwater

If this map shows potential flood risk for you, ensure you take action to **plan and prepare for floods**. See [page 7](#) for more information.

- This map shows the area likely to flood in a significant flood event.
- This is referred to as a 1% Annual Exceedance Probability (AEP), which means there is a 1% chance of this size flood (or greater) happening in any year.

You can view an interactive version of this map using Corangamite Catchment Management Authority's [Corangamite Flood Portal](#), see [page 6](#) for details.

What might happen in a flood in your area?

Although no two floods are the same and the environment is constantly changing, the below table provides an idea of what to expect at different flood heights.

- **Before a flood:** Use the floodwater heights in the table to help you decide when you will need to act to protect yourself and your property in a flood event.
- **During a flood:** When a warning is issued by [VicEmergency](#), use the predicted floodwater height and warning information to understand what the potential impacts may be for you and your community.

Floodwater height (metres)	Potential impacts and previous flood events
5.34m	February 1973 flood event. Highest and most damaging flood in living memory. All shops and at least 50 houses experienced water above floor level flooding. Hamilton Highway closed west of Inverleigh.
4.21m	January 2011 flood event. The flood was caused by the Leigh River. Flood waters did not enter central Inverleigh as the Barwon River did not flood. Some outbuildings and sheds on properties along part of Cambridge Street experienced water up to 600mm deep.
4.31m	September 2016 flood event. Two people rescue from a car in rising floodwater on Teesdale-Inverleigh Road. Minor flooding of Lawson's Reserve, parkland, and gravel roads along Leigh River. No houses were flooded above floor level.
4.00m	Major flood level Possible flooding in central and western Inverleigh depending on rainfall intensity between Mt Mercer and Inverleigh.
3.89m	November 1978 flood event. Significant flooding and damage in Inverleigh. At least 30 buildings experience flooding of some kind.
3.77m	August 1965 flood event. Highway flooding west of Inverleigh. No buildings Impacted in town.
3.00m	Moderate flood level No flooding in Inverleigh township
2.00m	Minor flood level

*The height measurement is at the [Leigh River at Mt Mercer gauge](#).

^This table includes information from previous flood events.

What might happen in a flood in your area? (continued)

Some of the potential impacts will be dependant on which river floods.

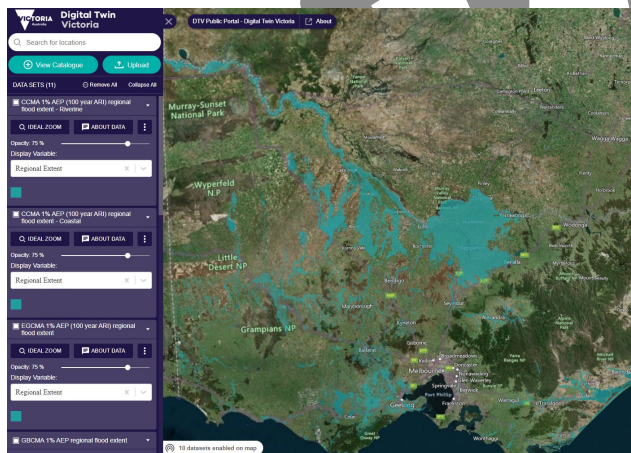

Barwon River flood impacts

- Rural residential properties on the southern side of Inverleigh.
- River Reserve between town and the junction of the rivers.
- Inverleigh Primary School
- Federation Bridge
- Northern football ground
- Beside the tennis courts.
- **Roads:** Burkes Road, Cambridge Street, Dawber Road, East Street, Hamilton Highway (west of town), High Street, Newman Street, Teesedale-Inverleigh Road, and Terrier Road.

Leigh River flood impacts

- Rural residential properties on the southern side of Inverleigh.
- Park and River Reserve
- **Roads:** Teesedale-Inverleigh Road, Dawber Road, Burkes Road, Hamilton Highway (west of town), Cambridge Street, High Street, Newman Street, East Street, and Terrier Road.

Plan and prepare for floods

1 How to stay informed

VicEmergency is Victoria's source of emergency information and warnings.

- Set-up a watch zone for your area for alerts when warnings are issued.
- Learn about the three different warning levels.

VicEmergency app
emergency.vic.gov.au
1800 226 226

vicemergency

@vicemergency

2 Make an Emergency Plan

Use information from your Local Flood Guide and your Catchment Management Authority, to help you decide;

- What you will do in a flood emergency
- When you will do it
- Who you will inform

Red Cross RediPlan is a free tool that helps you create a simple emergency plan that supports the flood actions you have chosen.

- Visit redcross.org.au/prepare
- Download the [Get Prepared](#) app

3 Prepare an emergency kit

You may need to stay safe for 72 hours in a disaster before help arrives. Make sure you have safe drinking water, food, and any special needs or medications for all family.

There will be extra items to be added to your emergency kit in an emergency like clothes, a phone and charger.

Watch a video on how to get your Emergency kit ready.
youtu.be/XgyLnKDMkNo

4 Reduce impacts to your property

- ☐ Keep gutters and drains clear of debris including leaves and any other items.
- ☐ Check your building and contents insurance, what kind of flooding does it cover?
- ☐ Move your valuable possessions up high.
- ☐ Back up important files and documents to a cloud storage or USB kept elsewhere.
- ☐ Identify higher ground on or around your property, away from the danger area.
- ☐ Consider buying sand and sandbags ahead of time, refer to our Sandbag Guide for more information.

Emergency broadcasters

Radio | ABC 774 AM, K-Rock 95.5 FM, 93.9 Bay FM
TV | Sky News

If you expect floodwater at your property

1

Bag it

Sandbag doorways and low-lying windows to slow floodwater entering your home.

2

Block it

Block toilets, bath and drains using a sandbag ideally placed inside a plastic rubbish bag.

3

Lift it

Put your valuables and electrical items as high as possible. Turn off power, gas, and water at the mains.

4

Leave

- Leave **before** the flood arrives.
- Check warnings from VicEmergency for information like evacuation or relief centres, and road closures.
- Travel to the home of family or friends who are in a safe location, away from the flooded area.

Take your emergency kit and add the items below:

Phone & charger

Prescriptions & medication

Clothes for your family

Strong shoes

Pet needs

Never drive through floodwater

Large

A Large 4WD can be moved by water only 45cm deep.

Small

A small car can be moved by water only 15cm deep.

Sandbags and sand

Preparing your home

Having sandbag supplies ready can assist you before a flooding emergency occurs.

What supplies do I need to sandbag my home?

- Sandbags
- Sand
- Plastic sheeting
- Gloves and safety goggles
- Shovel or hand scoop

Where can I purchase these supplies?

- Many sandbag supplies can be purchased from hardware stores or garden centers.
- VICSES do not routinely supply sandbags to households.
- During floods, sandbag distribution points may be established in flood-affected areas.

How many sandbags will I need and how much sand?

- Most homes can be protected by less than 25 sandbags.
- The number of sandbags will depend on your local flood risk and availability.
- Sandbags are filled 2/3 full which requires around 15-20kgs of sand per bag.

How do I store my sand and sandbags?

- Filled sandbags only have a short shelf life.
- It is recommended to store sandbags empty.
- Sandbags should be stored in a cool dry area away from UV light.
- Sand should be kept dry and can be stored in water-resistant containers or under a tarp.
- Sand is heavy - ensure it is stored so it can be moved safely.

When should I sandbag my home?

- **You** are best placed to decide if there is a need to sandbag your home, based on local knowledge and past flood events.
- Monitor your local conditions. Stay up-to-date with weather forecasts and warnings by downloading the **BOM Weather** and **VicEmergency** apps, or call the VicEmergency Hotline on 1800 226 226.
- If you think you are at risk, do not wait for an official warning to act.

Sandbagging

Protecting your home

Sandbags won't stop the water completely, but can reduce the amount of water entering your home.

How do I fill a sandbag?

- Only use sand to fill hessian bags. Do not use dirt.
- Only fill sandbag two-thirds full.
- Do not over fill the sandbag as it will be too heavy to carry.
- Do not tie the top of the sandbag.
- Take care when filling and lifting the sandbag, to avoid injury.

How do I lay sandbags?

- Lay sandbags like brickwork. Stagger rows so that the joins do not line up.
- Start at one end and work to the other end.
- Ensure the unfilled part of the bag is covered by the next bag.
- Tuck flap under the bag at the end of the row.
- If the sandbag wall is going to be more than five (5) bags high, you will need to lay two (2) rows wide.

Where do I place the sandbags?

- Place sandbags in plastic bags to cover drainage holes in home (e.g. showers, toilets, sinks) to stop back flow of water.
- Place a small wall across doorways, at least the height of the expected water level. Be careful not to trap yourself inside.
- If available, plastic sheeting may be used under sandbags to reduce the seepage.

Block it

Toilets, bath and all drain holes

Plastic Sheetting

What do I do once I have finished with the sandbags?

- Sturdy gloves should be worn when handling wet sandbags as they can contain chemicals, waste and diseases.
- Sandbags that have been in contact with floodwater need to be thrown away.
- Contact your local council to find out how to dispose of your sandbags safely.
