# Section 1: Introduction

## Introduction

The VICSES Preschool / Primary School Disaster Readiness Program (SES for Schools) has been developed with the aim to assist SES members to confidently visit preschool and primary school educational settings to conduct information sessions with all children at their curriculum levels on the two main natural disaster risk reduction topics, **Flood and Storm Emergency Readiness**.

In addition to the program, there will be opportunity to implement extension activities for Landslide and Earthquake emergency readiness.

The program has been developed in collaboration with VICSES members, Educators / Teachers, National and State Government Partners.

- **Be Flood Ready** – Know your hazards, Find your local flood guide, Never drive in floodwater, Bag it Block lift it and leave.  
<https://www.ses.vic.gov.au/plan-and-stay-safe/flood-guides>
- **Be Storm Smart** – What you need to do prepare your house for storms.  
<https://www.ses.vic.gov.au/plan-and-stay-safe/emergencies/storm>
- **Plan and Stay Safe** – How to plan for emergencies.  
<https://www.ses.vic.gov.au/plan-and-stay-safe>

Within each of **three topics**, there are **session plan** options designed for the following year levels:

- **Preschool** (3 – 5 yrs)
- **Foundation to Level 2** (5 – 8yrs)
- **Level 3 to Level 4** (8 – 10yrs)
- **Level 5 to Level 6** (10 – 12yrs)

## Introduction cont....

### Post – Visit lesson plans

A generic teacher post-visit lesson plan has been provided for preschool and all levels of primary school. This part is in section 3 - 7 (pages 22-60).

The post visit lesson plan is generic and can be used following any of the **Be Flood Ready**, **Be Storm Smart**, or **Emergency Ready** presentations.

Activity plans have been designed so you can deliver them without needing emergency vehicles or specialised rescue equipment.

While the emergency services vehicles or specialist equipment can be included in the SES incursion, please be aware that it may distract children from the key safety

messages. It's important that the focus remains on helping children learn **how to stay safe**.

We've included general information and resources to support your post visit lesson delivery.

In addition to the three key topics

**Be Emergency Ready**  
**Be Flood Ready,**  
**Be Storm Smart,**

**Extension:** section 7 (Page 60)

This program also includes **Landslide and Earthquake** activities. (approx. 10 - 20 minutes each)

## Introduction cont...

### Post SES visit – Classroom tips

#### 1. Recall the visit

Who visited us?

What is an emergency?

Which types of emergencies does the SES help with?

#### 2. Reflect on the experience

What was your favourite part of the visit from the SES?

Discuss students' responses and encourage them to share what they enjoyed or found interesting.

#### 3. Share learning beyond the classroom

Did you tell someone at home about what you learnt?

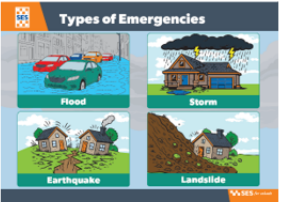

What did you share with them?

**Discuss students' responses and reinforce the importance of sharing safety information with family and friends.**

# Introduction cont...

## Contents of the SES for Schools resource kit (SES members)

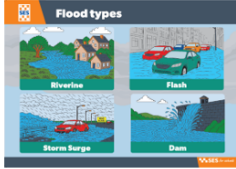

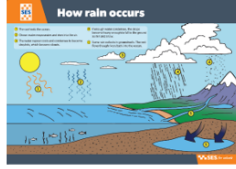

### Emergency Ready

Types of Emergencies <a href="#">Corflue 1</a>		Build an emergency kit <a href="#">Corflue 2</a>	
Paddy <a href="#">Corflue 3</a>		Additional	- SES for Schools program booklet - Build an emergency kit card (26) 
Additional	- Emergency Ready core activity schedule visit sheet example - DIY resource prop sheet - School visit teacher survey forms		

## SES for Schools Program resources

The SES for Schools Resource Kit has been designed to equip SES members with everything needed to conduct a school visit.

### Flood Ready

Flood Types <a href="#">Corflue 1</a>		What's in floodwater <a href="#">Corflue 2</a>	
Floodwater dangers <a href="#">Corflue 3</a>		How rain occurs <a href="#">Corflue 4</a>	
Additional	- Flood Ready core activity schedule visit sheet example - DIY resource prop sheet		

### Be Storm Smart

Storm Types <a href="#">Corflue 1</a>		Before the Storm hits <a href="#">Corflue 2</a>	
Before the Storm hits (Apartment) <a href="#">Corflue 3</a>		After the storm hits <a href="#">Corflue 4</a>	
Additional	- Storm Smart cards (5) - Be Storm Smart activity schedule visit sheet example - DIY resource prop sheet		

# General Background information

The following resources can assist educators in preparing for lessons:  
General information about SES and key messages See ...

**Section 2:** Planning. (Page 19)  
General glossary of terms

**Sections 3 to 6:** Year level program outlines

**Section 7:** Extension (Page 60 )  
Landslide  
Earthquake

**Section 8:** Acknowledgements (Page 63 )

**Section 9:** Appendices (Page 65)  
Resources  
Useful websites links  
DIY guides

Additional information is also available on the VICSES Website: **SES for Schools**

<https://www.ses.vic.gov.au>

## General Background information cont...

### Working with Children Check

VICSES is a child safe organisation.

As of 15 March 2026, All SES members are required to hold a current Working with Children Check.

This check helps protect children from harm by preventing individuals who may pose a risk from working or volunteering with them.

Working with Children Act 2005 (Vic)

### VICSES Policy 1.57 Child Safety Policy.

### National Police Check

All SES members do have a Nationally Coordinated Criminal History Check (NCCHC). This is an Australian police check that provides a summary of an individual's disclosable criminal history across all states and territories. It is conducted with the SES members consent and is commonly required for employment, volunteering, or occupational licensing, particularly in roles like education, healthcare, or finance. The check includes police information from national and state/territory police records and the Australian Criminal Intelligence Commission (ACIC).

### Policy 1.58-1 Member screening procedure (WWCC & NCCHC)

# SES uniform to wear when presenting

When conducting community engagement activities, SES volunteers are encouraged to wear the SES uniform (as shown in the example provided).

## Emergency Sensitivities and Children

- Experienced an emergency directly
- Heard frightening or distressing stories
- Been shielded from such realities altogether

Because of this, it is important to approach topics with sensitivity and awareness, ensuring that details are presented carefully to avoid frightening or upsetting children.

Children process emergencies very differently depending on their age, development, and past experiences. What you've written is a strong foundation for setting the tone when introducing this topic. If you'd like, I can help you expand this into a short guide for adults (teachers, parents, carers) that includes:

Why sensitivity matters (acknowledging children's varied experiences)

- **Practical approaches** (age-appropriate language, reassuring tone, focusing on safety and helpers)
- **What to avoid** (graphic details, sensationalism, assuming all children understand the same way)
- **Ways to support children afterwards** (encouraging questions, offering reassurance, noticing signs of distress)

## Emergency Sensitivities and educators

- Experienced an emergency directly
- Heard frightening or distressing stories
- Been shielded from such realities altogether

Work colleagues may have had a range of experiences in the past with emergencies and may present memories of both positive or negative experiences.

**Before:** care should be taken to ensure that participation in the sessions does not exacerbate or re-trigger previous trauma.

This may include communicating with appropriate leadership staff members and providing colleagues with an opportunity to privately talk if they have experienced a distressing event.

Why sensitivity matters (acknowledging educator's varied experiences is very important)

For teachers who may need additional support please refer to the Victorian Government School Wellbeing Resources

Web Link:

<https://www2.education.vic.gov.au/pal/occupational-health-safety-wellbeing-management/guidance/employee-wellbeing-support-services>

# Using technology

During SES visit sessions and educator post-visit lessons there may be a need to use technology in the classroom. (e.g., computers, smart boards, laptops, or data projectors).

The SES visit sessions are designed to run with or without requiring technology

However, the optional use of multimedia is encouraged where possible.

Suggestions such as short videos, sound clips, or other digital resources (links in Educator guide)

are included in the lesson plans and may be incorporated at the SES presenter's discretion, depending on the school's facilities availability.

## SES for Schools – Student Glossary

Some of the words used in emergencies can be tricky. If you don't understand a word, you can use this glossary to help you.

Word	Meaning
atmosphere	a layer of gas that surrounds our earth
awash	to be covered with water
condensation	when water changes from a gas into a liquid
constant	a value that does not change
contamination	something dirty or unwanted
converging	coming together
displaced	moved to somewhere else
downpour	heavy rainfall
equator	an invisible line that wraps around the earth marking the centre (between the north pole and the south pole)
evacuate	to leave in an emergency situation
evaporate	When water changes from a liquid to a gas
fatalities	A death resulting from an accident or a disaster
forecast	To calculate or estimate something in advance, like the weather
hazard	something dangerous
impassable	cannot cross over
intensify	to get stronger
inundation	to cover with floodwater
isolated	far away from other places or surrounded by water
localised	something that happens in one area
peak	the highest point
precipitation	water that falls from the sky either as rain, hail or snow
provisions	a supply of food and drink
sodden	very wet
tides	the rise and fall of sea levels
torrential	water falling or flowing very fast and hard
water vapour	the gas form of water
waterways	any water that you can navigate through including rivers, lakes, seas, oceans, and canals
whirlpool	water spinning around very fast

# Planning

## School bookings

School visits may be arranged in several ways:

- Through the VICSES website using the request form <https://www.ses.vic.gov.au/ses-for-schools>
- By a school contacting the nearest SES Office. <https://www.ses.vic.gov.au/about-us/contact-us>

To assist with this process, a set of templates is provided at the end of this in **section 9 Appendices** (Page 65). These include:

- School booking form – Online link
- Booking checklist

**Note:** When booking the **SES for Schools visit**, please ensure enough lead time beforehand is given. It is recommended to give **4 weeks prior notice** to book a SES visit to your school.

SES members are volunteers and their availability, suitable dates / times need to be confirmed.

# Planning

## Curriculum connections

The VICSES Early Years Primary School Disaster Readiness Program has been designed to support presentations across Preschool and all levels of Primary School.

With strong links to the National Quality Standards, Multi aged learning frameworks; Early Years Learning Framework, My Time Our Place, Australian Curriculum v9.0, Victorian Early Years Learning and Development Framework, Victorian Curriculum v2.0.

This is the standard curriculum frameworks used by all Victorian government, Independent and private schools for planning, assessment, and reporting to parents.

By including these curriculum links:

Teachers and Educators can record student learning outcomes from the visit

Teachers / Educators can justify time spent outside of regular classroom activities

Curriculum connections are outlined in each section of the resource.

**Section 9: Appendices** (Page 65).

## SES for Schools program - Educator guide

### Preparation

*This section contains information about planning your post – visit lesson outline.*

#### Choosing the lesson and preparing

By selecting the appropriate year level and lesson from the key topics from the Educator guide.

**VICSES website:** SES for Schools – Educators

<https://www.ses.vic.gov.au>

Resources for students and educators are available in electronic version. This can be downloaded and print off beforehand.

The school post-visit resource is broken up into the following four topics:

- 1: Emergency Ready
- 2: Flood Ready
- 3: Be Storm Smart

4: *Extension (Landslide or Earthquake)*

Each section contains a general introduction together with the step-by-step lesson guides for preschool and all levels primary school. There is take home activities available too. (Families)

## SES for Schools - Booking information

**Getting involved is easy**  
This free incursion program is available to all Victorian preschools and primary schools. Interactive presentations are offered on Emergency Ready, Be Flood Ready, and Be Storm Smart, each with strong links to the Australian and Victorian Curricula.

Presentations are available for all year levels:

- **Preschool / Foundation – Level 2:** 30–45 minutes
- **Level 3 – Level 6:** approximately 45 - 60 minutes

If you would like to participate, please complete and return the booking form and contact us.

**Booking form link:** <https://www.ses.vic.gov.au/educational-activities/school-visits>

Please note while we do our best to accommodate all requests, unfortunately we are not always able to guarantee a volunteer presenter can attend on your requested date/time.

### SES for Schools booking checklist

When making a booking, use this checklist as a guide to ensure the SES presenter is prepared before arriving at the preschool / school.

The questions will help educators and SES presenters prepare for their session(s) and identify any potential issues before arriving at the school.

1. Where is the office / reception located?
2. Where should the SES presenter park their car?
3. Who is the contact person at the preschool / school?
4. Is audio/sound equipment available (e.g. speakers)?
4. The presenter will have video clips.
5. Does the preschool / school have display equipment for a PowerPoint presentation?
6. Do you require pre-visit details of the presenter's Working with Children Check?
7. Are there any students with additional needs?
8. Has the local community experienced any recent emergencies, trauma or natural disasters?
9. Are there any other issues the presenter should be aware of before attending?

## Home Emergency Kit

How to Create a Home Emergency Kit for step-by-step instructions.

 **SES for Schools – DIY Guides**

How to Create a **Home Emergency Kit** for step-by-step instructions.

A display **Home Emergency kit** may be available for you to use during your presentation.

In the event that this kit is not available, or you would like to create your own kit, the following resource may be of assistance.

**General items for any emergency kit**

- Portable radio with spare batteries or even better a hand-crank radio (these do not require batteries and can be purchased from some camping stores). So, you are able to listen to warnings and follow advice if there are power outages or you are travelling.
- Torch with spare batteries: To use during power outages and low light.
- First Aid kit: In case someone is injured.
- A copy of your emergency plan: This plan should have important numbers, evacuation routes, emergency broadcaster information and advice on what to do before, during and after different emergencies.
- Copy of important documents and records: These could be required when registering for relief centres and submitting insurance claims.
- Bottled drinkable water: The amount will differ depending on your situation and the number of people in your household.
- Non-perishable food: Think about the sort of food you would take camping, make sure you replace the food in your emergency kit every year or before they expire.
- Gloves (rubber gloves/ sturdy garden gloves) To prevent injury or contamination

**Specific items that some families will have to consider**

- Food and special requirements for children. Bottles, nappies or even small toys/ colouring in books.
- Food and special requirements for pets. Cats must be in a cage, and dogs must be on a leash. Take a container that can be filled with water.
- Special health requirements such as reading glasses or asthma inhaler.

**Items to add after a warning is issued**

Suggest that the following items are listed in the emergency plan as reminder to add them during an emergency.

- Prescription medication.
- Mobile phone and charger.
- Strong shoes and clothing for your whole family.

SES for Schools | DIY Guides | 1 |  SES For schools

**Other things to mention**

An emergency kit can be useful in a number of different ways including:

- Quick and organised evacuation during an emergency.
- Provisions in event of isolation during an emergency (roads blocked / no transport).
- Non-critical emergencies such as blackouts.
- Keeping copies of all important documents and records in the one place so they easy to find in any situation.

Stress that an emergency kit should be specific to each household. Items such as photos, family keepsakes or valuables should also be considered. Emergency kits should also be practical. They can be located in a backpack, suitcase on wheels, plastic or weatherproof container as long as it is portable.

Include some non-emergency items either from around your house or things in the classroom (with the teacher's permission), as:

- Lamp
- Plants
- Basketball
- Bat or racquet
- Sandwiches
- Furniture
- toys

## Floodwater Hazard Kit

How to Create a Floodwater Hazard Kit for step-by-step instructions

 **SES for Schools – DIY Guide**

How to Create a Floodwater Hazard Kit for step-by-step instructions.

A Floodwater Hazard kit for student activity in the Flood Ready session.

See below materials and instructions on how to create your own Floodwater Hazard kit resource.

**General items for Floodwater Hazard Kit**

- 8L storage tub (hardware store)  
34.5cm x 25cm x 14cm

- 4x pairs of tongs (Opportunity shop)
- 2x toy cars (Kmart / Big W)
- A handful of insect/ bugs/ snake/ trees - small figures (Novelty items shop)
- 4x Medicine syringes (Novelty items shop)
- 1 cup of small rocks/gravel (Garden)
- Small twigs and sticks (Garden)
- 1 tin of instant coffee (kitchen)

SES for Schools - Floodwater Hazard Kit      DIY Guides 1       SES For schools

**Instructions**

1. Pour 2L - 4L water into the storage tub.
2. Dilute 1 teaspoon of coffee into the water.
3. Place all the small figures, rocks, twigs and sticks into the storage tub, ensure all items are submerged.

**Completed Floodwater hazards kit**

**Things to Consider**

- Only fill 1/3 of storage tub with water and items into the storage tub before students interact with the activity.
- Place four tongs beside the tub.
- It's helpful to have drop sheet and towels available to place under the Floodwater hazards kit.

## Don't Drive in Floodwater Kit

### How to Create a Don't drive in Floodwater Kit for step-by-step instructions

**SES for Schools – DIY Guide**

How to Create a Don't drive thru Floodwater Kit for step-by-step instructions.

A Don't drive thru Floodwater kit for student activity in the Flood Ready session.

See below materials and instructions on how to create your own Don't drive thru Floodwater resource.

**General items for Don't drive thru Floodwater Kit**

- A cat litter tray (pet supply / hardware store)  
40cm x 30cm
- 1x Organiser tray (Hardware store)  
34.5cm x 25cm x 6.5cm
- 1x Vinyl Square Tile (Hardware store)  
45.7cm x 45.7cm
- 2x toy cars (Kmart / Big W)
- 1 cup of small rocks/gravel (Garden)
- 1x Bag of Sand - river wash / sandpit version (Hardware store)
- 1x bottle of liquid paper (Supermarket)
- 1x Stanley knife (Hardware store)
- A ruler (Supermarket)
- 1x HB pencil (Supermarket)

**Instructions**

1. Drill small holes in the bottom of organiser tray.
2. Measure vinyl square tile into strips (road)
3. Drawn lines with HB pencil across strip and road lines.
4. Use liquid paper to go over outline of road lines.
5. Draw with HB pencil road lines and cut to create pieces.
6. Place sand, rocks into the organiser tray. (Mock road base)
7. Place cut out road pieces on top of the road base.
8. Place the two cars on to the road.

**Completed prop insert tray**

**Things to Consider**

- Only fill 1/2 of Litter tray with water before students place the completed prop insert tray
- It's helpful to have drop sheet and towels available to place under the Don't drive thru Floodwater Kit.
